Background and Purpose

The International Convention for the Prevention of Pollution from Ships (MARPOL), is an international agreement on the subject of marine pollution. The United States is a party to the Convention and has developed national regulations implementing the standards set out in MARPOL. MARPOL Annex V provides regulations for the prevention of pollution by garbage from ships. Annex V also allows for the creation of special areas with more stringent regulations for the discharge of garbage.

In September 1990, the United States proposed to the International Maritime Organization (IMO), Marine Environment Protection Committee, to establish the Gulf of Mexico as a special area under MARPOL Annex V. In November 1990, Venezuela submitted an amendment to the proposal to include the Wider Caribbean region along with the Gulf of Mexico as a special area under MARPOL Annex V. The IMO adopted the WCR special area, including the Gulf of Mexico and the Caribbean Sea, in July 1991. In August 1995, the Coast Guard added the WCR special area to the Code of Federal Regulations, as described in 33 CFR 151.06(a)(12) (see, 60 FR 43377, Aug. 21, 1995; 73 FR 35013, Jun. 19, 2008). In accordance with 33 CFR § 151.53 and paragraph 4(b) of Regulation 5 of Annex V of MARPOL, the WCR special area will enter into effect when each party to the Convention whose coastline borders the WCR special area has certified that reception facilities are available and the IMO establishes an effective date for the special area.

In accordance with MARPOL Regulations 5 and 7, the United States has provided the required notification to IMO regarding our MARPOL Annex V reception facilities. However, because all of the parties to MARPOL within the WCR special area have yet to make sufficient notifications that reception facilities exist in the WCR special area
