SUPPLEMENTARY INFORMATION:

Title: Importation of Products of Poultry and Birds.

OMB Number: 0579-0141.

Type of Request: Extension of approval of an information collection.

Abstract: Under the Animal Health Protection Act (7 U.S.C. 8301 *et seq.*), the Animal and Plant Health Inspection Service (APHIS) of the United States Department of Agriculture is authorized, among other things, to prohibit or restrict the importation and interstate movement of animals and animal products to prevent the introduction into and dissemination within the United States of livestock diseases and pests. To carry out this mission, APHIS regulates the importation of animals and animal products into the United States. The regulations are contained in title 9, parts 92 through 98, of the Code of Federal Regulations.

Part 94, § 94.6, governs the importation of carcasses, parts or products of carcasses, and eggs (other than hatching eggs) of poultry, game birds, and other birds to prevent the introduction of exotic Newcastle disease (END) and highly pathogenic avian influenza subtype H5N1 into the United States. Various conditions for importation apply.

These conditions include four information collection activities: (1) A certificate of origin that must be issued, (2) serial numbers that must be recorded, (3) records that must be maintained, and (4) cooperative service agreements that must be signed.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; e.g., permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 1.14285 hours per response.

Respondents: Full-time salaried veterinarians employed by the national government of the exporting region.

Estimated annual number of respondents: 4.

Estimated annual number of responses per respondent: 1.75.

Estimated annual number of responses: 7.

Estimated total annual burden on respondents: 8 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 5th day of August 2009.
