

NATIONAL SCIENCE FOUNDATION**Proposal Review Panel for Materials Research; Notice of Meeting**

In accordance with the Federal Advisory Committee Act (Pub. L. 92-463 as amended), the National Science Foundation announces the following meeting:

Name: Site Visit review of the Materials Research Science and Engineering Center (MRSEC) at Carnegie Mellon University (CMU), by NSF Division of Materials Research (DMR) #1203.

Dates and Times: September 28, 2009; 7:45 a.m.–9 p.m. September 29, 2009; 8 a.m.–3:30 p.m.

Place: Carnegie Mellon University, Pittsburgh, PA.

Type of Meeting: Part-open.

Contact Person: Dr. William Brittain, Program Director, Materials Research Science and Engineering Centers Program, Division of Materials Research, Room 1065, National Science Foundation, 4201 Wilson Boulevard, Arlington, VA 22230, Telephone (703) 292-5039.

Purpose of Meeting: To provide advice and recommendations concerning further support of the MRSEC at Carnegie Mellon University.

Agenda

Monday, September 28, 2009

7:45 a.m.–4:45 p.m. Open—Review of the CMU MRSEC.

4:45 p.m.–6 p.m. Closed—Executive Session.

6 p.m.–7 p.m. Open—Poster Session.

7 p.m.–9 p.m. Open—Dinner.

Tuesday, September 29, 2009

8 a.m.–9 a.m. Closed—Executive session.

9 a.m.–9:45 a.m. Open—Review of the Carnegie Mellon MRSEC.

9:45 a.m.–3:30 p.m. Closed—Executive Session, Draft and Review Report.

Reason for Closing: The work being reviewed may include information of a proprietary or confidential nature, including technical information; financial data, such as salaries and personal information concerning individuals associated with the proposals. These matters are exempt under 5 U.S.C. 552 b(c), (4) and (6) of the Government in the Sunshine Act.

Dated: August 18, 2009.

Susanne Bolton,

Committee Management Officer.

BILLING CODE 7555-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 40-9073; NRC-2009-0364]

Uranium One Incorporated; Moore Ranch In-Situ Recovery Project; New Source Material License Application; Notice of Intent To Prepare a Supplemental Environmental Impact Statement

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of Intent (NOI).

SUMMARY: Uranium One Incorporated (Uranium One) submitted an application for a new source material license for the Moore Ranch *In-Situ* Recovery (ISR) Project to be located in Campbell County, Wyoming, approximately 50 miles south-southwest of Gillette, Wyoming and approximately 45 miles north-northeast of Casper, Wyoming. The application proposes the construction, operation, and decommissioning of ISR, also known as *in-situ* recovery, facilities and restoration of the aquifer from which the uranium is being extracted. Uranium One submitted the application for the new source material license to the U.S. Nuclear Regulatory Commission (NRC) by a letter dated October 2, 2007. A notice of receipt and availability of the license application, including the Environmental Report (ER) and opportunity to request a hearing was published in the **Federal Register** on January 25, 2008 (73 FR 4642).

The purpose of this notice of intent is to inform the public that the NRC, as part of its process to determine whether Uranium One's license request should be granted, will be preparing a site-specific Supplemental Environmental Impact Statement (SEIS). The SEIS will tier off of the Generic Environmental Impact Statement for In-Situ Leach Uranium Milling Facilities (ISR GEIS). In addition, as outlined in 36 CFR 800.8, "Coordination with the National Environmental Policy Act" (NEPA) the NRC plans to use its environmental review process to coordinate compliance with Section 106 of the National Historic Preservation Act.

FOR FURTHER INFORMATION CONTACT: For general information on the NRC NEPA or the environmental review process related to the Moore Ranch ISR Project application, please contact the NRC Environmental Project Manager, Behram Shroff, at (301) 415-0666 or Behram.Shroff@nrc.gov.

Information and documents associated with the Moore Ranch ISR Project, including the license

application, are available for public review through our electronic reading room: <http://www.nrc.gov/reading-rm/adams.html> and on the NRC's Moore Ranch Site Web page: <http://www.nrc.gov/info-finder/materials/uranium/apps-in-review/moore-ranch-new-app-review.html>. Documents may also be obtained from NRC's Public Document Room at the U.S. Nuclear Regulatory Commission Headquarters, 11555 Rockville Pike (first floor), Rockville, Maryland.

SUPPLEMENTARY INFORMATION:**1.0 Background**

Uranium One submitted the application for the new source material license to the NRC for ISR facilities by a letter dated October 2, 2007. A notice of receipt and availability of the license application, including the ER, and opportunity to request a hearing was published in the **Federal Register** on January 25, 2008 (73 FR 4642). No requests for hearing were submitted.

Relying on the ISR GEIS, the NRC originally planned to document its site-specific environmental evaluations by publishing draft Environmental Assessments (EAs) for comment. However, during the development of the final ISR GEIS, NRC decided to prepare an SEIS that will tier off of the ISR GEIS for applications to license new ISR facilities. Accordingly, draft and final SEISs will now be prepared for the Moore Ranch ISR Project. NRC staff met with Federal (Bureau of Land Management—Cheyenne, Casper, Buffalo; Bureau of Indian Affairs—Fort Washakie; Fish & Wildlife Service—Buffalo), State (Wyoming Department of Environmental Quality—Cheyenne, Sheridan; State Engineer's Office; Governor's Planning Office; State Historic Preservation Office) and local government agencies (City of Casper Planning Office; City of Gillette Planning Department, Town of Wright, and City of Douglas) and public organizations (Campbell County Economic Development Corporation; Wyoming Community Development Authority; Converse Area New Development Organization) in January 2009 as part of a site visit to gather site-specific information to assist in the preparation of the Moore Ranch ISR Project environmental review. NRC also contacted potentially interested tribes and local public interest groups via e-mail and telephone to gather additional information.

The NRC has begun evaluating the potential environmental impacts associated with the proposed ISR facility in parallel with the safety review of the license application. The NRC is
