

local match: Procurement of rails, ties, and other specialized equipment; the procurement of commodities; and demolition.

FTA reminds project sponsors and the public that local funds expended by the project sponsor pursuant to and after the date of the pre-award authority are eligible for reimbursement or as credit toward local match only if FTA later makes a grant or grant amendment for the project. Local funds expended by the project sponsor prior to the date of the pre-award authority are not eligible for credit toward local match or reimbursement.

The above changes to automatic pre-award authority are expected to reduce the need for LONPs. FTA will still consider LONPs for activities not covered by automatic pre-award authority. As a change in administrative practice, FTA will, following the completion of the requirements under NEPA, expedite the issuance of LONPs, when appropriate, by no longer performing a detailed review of the cost and scope of the request in every instance. Rather, a limited review will be performed in those cases that are of a more routine nature, especially those involving an experienced sponsor.

This change has the following ramifications. First, an LONP is no longer an indication by FTA that the project is a promising candidate for either an FFGA or PCGA. Second, FTA is transferring more risk to the project sponsor. LONPs allow a project sponsor to incur costs using non-Federal resources, with the understanding that the costs incurred subsequent to the issuance of the LONP may be reimbursable as eligible expenses or eligible as credit toward the local match only if FTA approves the project for funding at a later date. Federal funding is not implied or guaranteed by an LONP. The reduced level of FTA oversight should expedite the delivery of New Starts and Small Starts projects, but will also require increased diligence on the part of project sponsors to ensure that public funds are expended wisely.

Advisory Circular 33-8, Guidance for Parts Manufacturer Approval of Turbine Engine and Auxiliary Power Unit Parts Under Test and Computation

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of issuance of advisory circular.

SUMMARY: This notice announces the issuance of Advisory Circular (AC) 33-8, Guidance for Parts Manufacturer Approval of Turbine Engine and Auxiliary Power Unit Parts under Test and Computation. This AC provides guidance for developing substantiation data to support the design approval of critical and complex turbine engine and auxiliary power unit (APU) parts produced under parts manufacturer approval. This guidance is for the comparative test and analysis method used to show compliance to the airworthiness requirements under test and computation, per S21.303 of Title 14 of the Code of Federal Regulations (14 CFR). This method supports showing the engine or APU still complies with 14 CFR part 33 and Technical Standard Order (TSO) C77.

DATES: The Engine and Propeller Directorate issued AC 33-8 on August 19, 2009.
