

Since significant changes in Marsan's ownership and corporate structure have occurred that could potentially affect the nature and extent of the company's subsidization, pursuant to our new policy outlined above, we are finding that Marsan's merchandise is not entitled to enter under the CVD cash deposit rate previously established in the last CVD administrative review of Gidasa. Accordingly, we preliminarily determine that Marsan's merchandise should continue to enter under the "all others" CVD rate.

Department of the Army; Corps of Engineers

Intent To Prepare a Draft Supplemental Environmental Impact Statement for the Louisiana Coastal Area (LCA)—Louisiana, Modification of Caernarvon Project

AGENCY: Department of the Army, U.S. Army Corps of Engineers, DoD.

ACTION: Notice of intent.

SUMMARY: The U.S. Army Corps of Engineers (USACE) intends to prepare a supplemental environmental impact statement (EIS) for the Louisiana Coastal Area (LCA)—Louisiana, Modification of Caernarvon Diversion Project. This modification project will be designed to increase wetland restoration outputs. This supplemental EIS will be tiered off of the programmatic final EIS for the Louisiana Coastal Area (LCA)—Louisiana, Ecosystem Restoration Study, November 2004, and the final EIS for the LCA—Louisiana, Freshwater Diversion to Barataria and Breton Sound Basins Study, September 1984. The record of decision (ROD) for the programmatic final EIS was signed on November 18, 2005 and the ROD for the freshwater diversion final EIS was signed on July 16, 1987.

DATES: A scoping meeting is planned for October 8, 2009, see **SUPPLEMENTARY INFORMATION** section for scoping meeting location.

FOR FURTHER INFORMATION CONTACT:

Questions concerning the draft supplemental EIS should be addressed to Michael T. Brown, CEMVN-PM-RP, P.O. Box 60267, New Orleans, LA 70160-0267; telephone: (504) 862-1570; fax: (504) 862-2088; or by e-mail: michael.t.brown@usace.army.mil.

SUPPLEMENTARY INFORMATION:

1. *Authority.* This supplemental EIS will be tiered off of the programmatic final EIS for the LCA—Louisiana, Ecosystem Restoration Study, November 2004 and the final EIS for the LCA—Louisiana, Freshwater Diversion to Barataria and Breton Sound Basins Study, September 1984. The Water Resources Development Act of 2007 (WRDA 2007) authorized fifteen projects under the LCA program. The authority includes requirements for

comprehensive planning, program governance, implementation, and other program components. The LCA restoration program will facilitate the implementation of critical restoration features and essential science and technology demonstration projects, increase the beneficial use of dredged material and determine the need for modification of selected existing projects to support coastal restoration objectives. The LCA near-term plan includes fifteen elements authorized for implementation contingent upon meeting certain reporting requirements. Specifically, Section 7006 (e)(1)(C) instructs the Secretary of the Army to carry out the following project referred to in the restoration plan: (C) Modification of Caernarvon Diversion at a total cost of \$20,700,000. The Congressional language further directs completion of a feasibility report of the Chief of Engineers, and subsequent submission to the Committee on Transportation and Infrastructure of the House of Representatives and the Committee on Environment and Public Works of the Senate.

2. *Proposed Action.* The Modification of Caernarvon Diversion Project would increase wetland restoration outputs in the Breton Sound Basin. The objective of this modification project is to: Maximize the use of the existing diversion structure for the purpose of decreasing wetland loss and increasing habitat quality.

3. *Alternatives.* Restoration measures being considered include changing the structure's operational plan to flow at maximum capacity; to flow at 5,000 cubic feet per second (cfs) on average; and to include pulsing (fully opening the structure's gates during a rise in the Mississippi River to maximize suspended sediment delivery). Other possible alternatives include physical land modifications to divert water to areas that currently do not receive diversion flows; marsh restoration; shoreline protection; terracing; and vegetative plantings. Alternative plans will be developed through various combinations of restoration measures that best meet the study goals and objectives and is determined to be cost-effective, environmentally acceptable and technically feasible.

4. *Public Involvement.* Public involvement, an essential part of the supplemental EIS process, is integral to assessing the environmental consequences of the proposed action and improving the quality of the environmental decision making. The public includes affected and interested Federal, state, and local agencies, Indian tribes, concerned citizens, stakeholders,
