**SUPPLEMENTARY INFORMATION:** On January 12, 2007, Congress amended the Magnuson-Stevens Fishery Conservation and Management Act (MSA) with passage of the Magnuson-Stevens Fishery Conservation and Management Reauthorization Act (MSRA). While maintaining the requirement that "conservation and management measures shall prevent overfishing while achieving, on a continuing basis, the optimum yield from each fishery for the United States fishing industry," the MSRA added new requirements to end and prevent overfishing. The new requirements include the use of ACLs, and "measures to ensure accountability" (AMs).

Specifically, the MSRA requires that FMPs "establish a mechanism for specifying annual catch limits in the plan (including a multi-year plan), implementing regulations, or annual specifications, at a level such that overfishing does not occur in the fishery, including measures to ensure accountability" (Section 303(a)(15)). Further, the MSRA requires such measures be implemented by 2010 for fisheries determined by the Secretary of Commerce (Secretary) to be subject to overfishing and by 2011 for all other fisheries. The AMs are management controls that ensure the ACLs are not exceeded. Examples of AMs include corrective measures if overages occur and implementation of an in-season monitoring program.

The generic amendment is intended to modify five of the Council's FMPs. These include FMPs for: Reef Fish Resources, Shrimp, Stone Crab, Coral and Coral Reef Resources, and Red Drum. NMFS and the Council will develop these ACLs in co-operation with the Scientific and Statistical Committee. NMFS, in collaboration with the Council, will develop a DEIS to evaluate alternatives and actions for the ACLs. Some examples of these actions include: establishing sector specific ACLs, selecting levels of risk associated with species yields, considering removal or withdrawal of species from FMPs, and delegating species or species assemblages to state regulators.

In accordance with NOAA's Administrative Order NAO 216-6, Section 5.02(c), the Council has identified this preliminary range of alternatives as a means to initiate discussion for scoping purposes only. This may not represent the full range of alternatives that eventually will be evaluated by the Council.

The meetings will be physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to the Council (see **ADDRESSES**).

After the DEIS associated with the regulatory action is completed, it will be filed with the Environmental Protection Agency (EPA). The EPA will publish a notice of availability of the DEIS for public comment in the **Federal Register**. The DEIS will have a 45-day comment period. This procedure is pursuant to regulations issued by the Council on Environmental Quality (CEQ) for implementing the procedural provisions of the National Environmental Policy Act (NEPA; 40 CFR parts 1500-1508) and to NOAA's Administrative Order 216-6 regarding NOAA's compliance with NEPA and the CEQ regulations.

The Council and NMFS will consider public comments received on the DEIS in developing the final environmental impact statement (FEIS) and before adopting final management measures for the action. NMFS will submit both the

final measures and the supporting FEIS to the Secretary for review, approval, and implementation. NMFS will announce in the **Federal Register** the availability of the final amendment and FEIS for public review during the secretarial review period, and will consider all public comments prior to final agency action to approve, disapprove, or partially approve the final amendment.

**FOR FURTHER INFORMATION CONTACT:** Amy Sloan or Kate Swails, (301)713-2289.

**SUPPLEMENTARY INFORMATION:** The subject permit is requested under the authority of the Marine Mammal Protection Act of 1972, as amended (MMPA; 16 U.S.C. 1361 *et seq.*) and the regulations governing the taking and importing of marine mammals (50 CFR part 216).

The proposed five-year permit comprises a continuation of psychological and physiological studies at Long Marine Laboratory with captive pinnipeds, including California sea lions (*Zalophus californianus*); harbor seals (*Phoca vitulina*); and northern elephant seals (*Mirounga angustirostris*), designed to evaluate their perceptual and cognitive capabilities. Measurements obtained using behavioral and physiological methods will be used to improve knowledge of pinniped sensory adaptations, examine cognitive mechanisms for acquiring and processing sensory information, and develop procedures for rapidly and humanely studying marine mammal hearing and the effects of anthropogenic noise. The captive animals are trained to voluntarily participate in behavioral stimulus detection and discrimination paradigms that may be conducted in air or under water. The applicant currently holds one California sea lion, one harbor seal, and one northern elephant seal, and requests permission to obtain additional animals for the research program over the duration of the permit, not to exceed a total of two of each species listed above. Additional animals would be obtained from captive and rehabilitation facilities, including permanently captive and non-releasable rehabilitated animals. If those sources are not available, releasable rehabilitated animals from West Coast rehabilitation facilities are requested.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activity proposed is categorically excluded from the requirement to

prepare an environmental assessment or environmental impact statement.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of the application to the Marine Mammal Commission and its Committee of Scientific Advisors.

Dated: September 9, 2009.
