SUPPLEMENTARY INFORMATION:

I. Abstract

The Census Bureau conducts the SIPP, which is a household-based survey designed as a continuous series of national panels. New panels are introduced every few years with each panel usually having durations of one to four years. Respondents are interviewed at 4-month intervals or "waves" over the life of the panel. The survey is molded around a central "core" of labor force and income questions that remain fixed throughout the life of the panel. The core is supplemented with questions designed to address specific needs, such as obtaining information on household members participation in government programs as well as prior labor force patterns of household members. These supplemental questions are included with the core and are referred to as "topical modules."

The SIPP represents a source of information for a wide variety of topics and allows information for separate topics to be integrated to form a single, unified database so that the interaction between tax, transfer, and other government and private policies can be examined. Government domestic-policy formulators depend heavily upon the SIPP information concerning the distribution of income received directly as money or indirectly as in-kind benefits and the effect of tax and transfer programs on this distribution. They also need improved and expanded data on the income and general economic and financial situation of the U.S. population. The SIPP has provided these kinds of data on a continuing basis since 1983 permitting levels of economic well-being and changes in these levels to be measured over time.

The 2008 panel is currently scheduled for 4 years and will include 13 waves of interviewing beginning September 2008. Approximately 65,300 households were selected for the 2008 panel, of which 42,032 households were interviewed. We estimate that each household contains 2.1 people, yielding 88,267 person-level interviews in Wave 1 and subsequent waves. Interviews take 30 minutes on average. Three waves will occur in the 2008 SIPP Panel during FY 2010. The total annual burden for 2008 Panel SIPP interviews would be 132,400 hours in FY 2010.

The topical modules for the 2008 Panel Wave 6 collect information about:

- Adult Well-Being.
- Employer Provided Health Benefits.
- Functional Limitations and Disability (Adults and Children).
- Support for Non-Household Members.
- Child Support Agreements.

Wave 6 interviews will be conducted from May 1, 2010 through August 31, 2010.

A 10-minute reinterview of 3,100 people is conducted at each wave to ensure accuracy of responses. Reinterviews require an additional 1,553 burden hours in FY 2010.

II. Method of Collection

The SIPP is designed as a continuing series of national panels of interviewed households that are introduced every few years with each panel having durations of 1 to 4 years. All household members 15 years old or over are interviewed using regular proxy-respondent rules. During the 2008 panel, respondents are interviewed a total of 13 times (13 waves) at 4-month intervals making the SIPP a longitudinal survey. Sample people (all household members present at the time of the first interview) who move within the country and reasonably close to a SIPP primary sampling unit will be followed and interviewed at their new address. Individuals 15 years old or over who enter the household after Wave 1 will be interviewed; however, if these individuals move, they are not followed unless they happen to move along with a Wave 1 sample individual.

SUPPLEMENTARY INFORMATION: On September 8, 2008, notice was published (73 FR 52027) of a request for a permit under the authority of the Marine Mammal Protection Act of 1972, as amended (MMPA; 16 U.S.C. 1361 *et seq.*), and the regulations governing the taking and importing of marine mammals (50 CFR part 216).

The applicant has amended the application to request the permit include annual harassment of up to 250 threatened Eastern Distinct Population Segment Steller sea lions (*Eumetopias jubatus*) and 100 Southern Resident killer whales (*Orcinus orca*) incidental to aerial surveys and underwater playback experiments, respectively.

The amended application still proposes conduct of research on Pacific harbor seals (*Phoca vitulina*), California sea lions (*Zalophus californianus*), and northern elephant seals (*Mirounga angustirostris*) within coastal waters and on pinniped rookeries and haul outs of Washington and Oregon. Please refer to the table in the amended application for the numbers of animals proposed for taking, and the locations and manner of such taking.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), a draft environmental assessment (EA) has been prepared to examine whether significant environmental impacts could result from issuance of the proposed scientific research permit. Based on the analyses in the EA, it is NMFS initial determination that issuance of the permit would not significantly impact the quality of the human environment and that preparation of an environmental impact statement is not required.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of the application to the Marine Mammal Commission and its Committee of Scientific Advisors.
