

being updated on November 19, 2007, U.S. Bus reported that the recall was complete and that notifications were mailed on May 1, 2007. This report is the only report NHTSA received from U.S. Bus in regard to this recall.

- NHTSA Recall 07V-223: Recall of 89 MY 2006–2007 model year Sturdibus and Universe handicap accessible buses with a wheelchair lift interlock module that may not lock the vehicle in park if the lift is operated with low battery voltage. U.S. Bus and TCI have not notified any owners of these vehicles of this non-compliance and have not remedied any of the vehicles involved.

- NHTSA Recall 07V-493: Recall of 137 MY 2007 US Bus Sturdibus School or Activity buses built on the GMT 610 Chevrolet Express Chassis, manufactured between September 1, 2006 and September 30, 2007. The buses failed to conform with FMVSS No. 108, lamps, reflected devices, and associated equipment. When the brakes are applied, the stop lamps will illuminate. When the brake pedal is released, the stop lamps are no longer illuminated but the rear brakes may still be applied. The brake may release after a few seconds or after the next firm brake pedal application. GM Dealers will reprogram the anti-lock brake system module. GM's recall began on October 17, 2007. In U.S. Bus' response, listed as being updated on November 19, 2007, U.S. Bus reported that information from GM had been collected and contact information for end users was being researched. U.S. Bus did not send out notifications.

NHTSA will conduct the public hearing to determine whether TCI reasonably met its obligations under the notification requirements of 49 U.S.C. 30118–30119 and the remedy requirements of 49 U.S.C. 30120. In the event NHTSA determines that TCI is obligated to complete the notification and/or remedy campaigns, it will order TCI to take actions to provide proper notification and/or effective remedies.
