to make basic health and safety determinations which show that use of l-Carvone when used in accordance with widespread and commonly recognized practice, will not generally cause unreasonable adverse effects to the environment.

III. Approved Application

EPA issued a notice, published in the **Federal Register** of March 4, 2009 (74 FR 9396) (FRL-8401-7), which announced that Bedoukian Research Inc., 21 Finance Dr., Danbury, CT. 06810, had submitted an application to register the pesticide product, Bedoukian l-Carvone, mosquito repellent (EPA File Symbol 52991-23), containing the new active ingredient, l-Carvone, comprised of oil from the spearmint plant. B. What Should I Consider as I Prepare My Comments for EPA?

1. *Submitting CBI.* Do not submit this information to EPA through www.regulations.gov or e-mail. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD-ROM that you mail to EPA, mark the outside of the disk or CD-ROM as CBI and then identify electronically within the disk or CD-ROM the specific information that is claimed as CBI. In addition to one

complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

- viii. Make sure to submit your comments by the comment period deadline identified.

II. Background

A. FIFRA Registrations

On January 31, 2008, EPA received applications from BASF Corporation, 26 Davis Dr., P.O. Box 13528, Research Triangle Park, NC 27709-3528, to register six new pesticide products containing saflufenacil as an active ingredient under section 3 of FIFRA, 7 U.S.C. 136a. Saflufenacil is a light dependent peroxidizing herbicide (LDPH) which acts by inhibiting protoporphyrinogen-oxidase (PPO) in the heme and chlorophyll biosynthetic pathway in plants. The applications sought the use of saflufenacil on a wide variety of agricultural use sites (cereal small grains, corn, chickpeas, cotton, edible beans and peas, lentils, lupine, sorghum, soybeans, sunflowers, fruit tree orchards, nut tree orchards and vineyards) as well as non-agricultural sites, including pine plantations, rights-of-way, bare ground and Christmas tree plantations.

The applications have been approved as Kixor Herbicide Technical (EPA

Registration Number 7969-275), Treevix Powered by Kixor Herbicide (EPA Registration Number 7969-276), Sharpen Powered by Kixor Herbicide (EPA Registration Number 7969-278), Integrity Powered by Kixor Herbicide (EPA Registration Number 7969-279), Optill Powered by Kixor Herbicide (EPA Registration Number 7969-280), and BAS 800 02/03 Powered by Kixor Herbicide (EPA Registration Number 7969-277).

The Agency approved the applications after considering all required data on risks associated with the proposed use of saflufenacil, and information on social, economic, and environmental benefits to be derived from its use. Specifically, the Agency considered the nature of the chemical and its pattern of use, application methods and rates, and level and extent of potential exposure. Based on these reviews, the Agency was able to make basic health and safety determinations which show that saflufenacil, when used in accordance with widespread and commonly recognized practice, will not generally cause unreasonable adverse effects on the environment.

B. FFDCA Tolerances

Along with the applications for registration of Kixor Herbicide Technical, Treevix Powered by Kixor Herbicide, Sharpen Powered by Kixor Herbicide, Integrity Powered by Kixor Herbicide, Optill Powered by Kixor Herbicide, and BAS 800 02/03 Powered by Kixor Herbicide, BASF Corporation filed a petition for tolerances under section 408 of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a. The petition requested that tolerances be established for residues of saflufenacil in or on legume vegetables (group 06), citrus fruits (group 10), pome fruits (group 11), stone fruits (group 12), tree nuts (group 14), pistachio, cereal grains (group 15), undelinted cotton seed, cotton gin byproducts, grape, foliage of legume vegetables (group 07), forage, fodder and straw of cereal grains (group 16), sorghum stover, almond hulls, sunflower seed, animal kidney, and animal liver.

In the **Federal Register** of June 13, 2008 (73 FR 33814) (FRL-8367-3), EPA issued a notice pursuant to section 408(d)(3) of FFDCA, 21 U.S.C. 346a(d)(3), announcing the filing of this petition.

III. What Action is the Agency Taking?

Although the Agency solicited comments on the petition for tolerances under the FFDCA, it did not do so regarding the applications for

registration under FIFRA. Therefore, EPA is now seeking comment on the registrations for the saflufenacil technical and end-use products, issued under section 3 of FIFRA. After consideration of all comments received, the Agency will take appropriate action based on that consideration and issue another **Federal Register** notice responding to comments received.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

This action is directed to the public in general, and may be of interest to a wide range of stakeholders including

environmental, human health, and agricultural advocates; the chemical industry; pesticide users; and members of the public interested in the sale, distribution, or use of pesticides. Since others also may be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. How Can I Get Copies of this Document and Other Related Information?

1. *Docket.* EPA has established a docket for this action under docket identification (ID) number EPA-HQ-OPP-2009-0191. Publicly available docket materials are available either in the electronic docket at <http://www.regulations.gov>, or, if only available in hard copy, at the Office of Pesticide Programs (OPP) Regulatory Public Docket in Rm. II. What Action is the Agency Taking?

The organic arsenicals include the pesticides monosodium methanearsonate (MSMA), disodium methanearsonate (DSMA), calcium acid methanearsonate (CAMA), and cacodylic acid and its sodium salt. The requests terminate the following uses of MSMA: Residential; forestry; non-bearing fruit and nuts; citrus, bearing and non-bearing; bluegrass, fescue and ryegrass grown for seed; drainage ditch banks; railroad, pipeline, and utility rights of way; fence rows; storage yards; and similar non-crop areas. In addition, the requests terminate all uses of MSMA in Florida except for use on cotton grown in Calhoun, Columbia, Escambia, Gadsden, Hamilton, Holmes, Jackson, Jefferson, Okaloosa, Santa Rosa, Suwannee, Walton, and Washington counties. The requests would not terminate the last MSMA products registered for use in the United States. These requests for voluntary cancellation and amendment of MSMA containing products are the result of an agreement in principle signed by the EPA and the technical registrants of the
