

the Gateway Generating Station, a natural gas fired power plant located near Antioch, California. The alleged violation arises from the construction of the plant by PG&E allegedly without an appropriate permit in violation of the Prevention of Significant Deterioration provisions of the Clean Air Act, 42 U.S.C. 7475, and without installing and applying best available control technology at the plant to control emissions of various air pollutants.

The proposed Consent Decree would resolve the claim alleged in the Complaint filed in this matter in exchange for PG&E's commitment to perform injunctive relief including: (1) Achieving more stringent limits for emissions of nitrogen oxides (NO_x) and carbon monoxide; and (2) installing and operating two computer software programs that are designed to limit the number of start-ups and shut-downs that the Gateway plant will experience and to further reduce NO_x emissions. The proposed Consent Decree also requires PG&E to pay a \$20,000 civil penalty.

The Department of Justice will receive comments relating to the proposed Consent Decree for a period of thirty (30) days from the date of this publication. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and mailed either electronically to pubcomment-ees.enrd@usdoj.gov or in hard copy to the United States Department of Justice, P.O. Box 7611, Ben Franklin Station, Washington, DC 20044-7611. Comments should refer to *United States v. Pacific Gas & Electric Company*, Civil Action No. 09-4503 (N.D. Cal.) and D.J. Ref. No. 90-5-2-1-09753.
