## General Information

### A. What Should I Consider as I Prepare My Comments for EPA?

1. *Submitting CBI.* Do not submit this information to EPA through *http://www.regulations.gov* or e-mail. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD-ROM that you mail to EPA, mark the outside of the disk or CD-ROM as CBI and then identify electronically within the disk or CD-ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for Preparing Your Comments.* When submitting comments, remember to:

- Identify the rulemaking by docket number and other identifying information (subject heading, **Federal Register** date and page number).
- Follow directions—The agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.
- Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.
- Describe any assumptions and provide any technical information and/or data that you used.
- If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.
- Provide specific examples to illustrate your concerns, and suggest alternatives.
- Explain your views as clearly as possible, avoiding the use of profanity or personal threats.
- Make sure to submit your comments by the comment period deadline identified.

**SUPPLEMENTARY INFORMATION:** Under section 108(a) of the Clean Air Act (CAA), the Administrator identifies and lists certain pollutants which "cause or contribute to air pollution which may reasonably be anticipated to endanger public health or welfare." The EPA then issues air quality criteria for these listed pollutants, which are commonly referred to as "criteria pollutants." The air quality criteria are to "accurately reflect the latest scientific knowledge useful in indicating the kind and extent of all identifiable effects on public

health or welfare which may be expected from the presence of [a] pollutant in the ambient air, in varying quantities.” Under section 109 of the CAA, EPA establishes primary (health-based) and secondary (welfare-based) national ambient air quality standards (NAAQS) for pollutants for which air quality criteria are issued. Section 109(d) of the CAA requires periodic review and, if appropriate, revision of existing air quality criteria. The revised air quality criteria reflect advances in scientific knowledge on the effects of the pollutant on public health or welfare. The EPA is also required to periodically review and revise the NAAQS, if appropriate, based on the revised criteria.

Air quality criteria have been established for particulate matter (PM) and NAAQS have been established for PM<sub>2.5</sub> and PM<sub>10</sub> to provide protection from fine and coarse particles, respectively. Presently, EPA is reviewing the air quality criteria and NAAQS for PM. The EPA’s overall plan and schedule for this review is presented in the *Integrated Review Plan for the National Ambient Air Quality Standards for Particulate Matter*.<sup>1</sup> A draft of the integrated review plan was released for public review and comment in October 2007 and was the subject of a consultation with the Clean Air Scientific Advisory Committee (CASAC) on November 30, 2007 (72 FR 63177; November 8, 2007). Comments received from that consultation and from the public were considered in finalizing the plan and in beginning the review of the air quality criteria.

As part of EPA’s review of the primary (health-based) and secondary (welfare-based) PM NAAQS, the Agency is conducting quantitative assessments characterizing (1) the health risks associated with exposure to ambient PM and (2) urban visibility impairment associated with PM. The EPA’s plans for conducting these assessments, including the proposed scope and methods of the analyses, were presented in two planning documents titled, *Particulate Matter National Ambient Air Quality Standards: Scope and Methods Plan for Health Risk and Exposure Assessment* and *Particulate Matter National Ambient Air Quality Standards: Scope and Methods Plan for Urban Visibility Impact Assessment* (henceforth, *Scope and Methods Plans*).<sup>2</sup> These documents were released for public comment in

February 2009 and were the subject of a consultation with the CASAC on April 2, 2009 (74 FR 11580; March 18, 2009). Comments received from the CASAC consultation (Samet, 2009)<sup>3</sup> as well as public comments on the Scope and Methods Plans have been considered in developing the draft assessment documents being released at this time.

The draft documents announced on September 10, 2009 (74 FR 46589) convey the approaches taken to assess exposures to ambient PM and to characterize associated health risks or urban visibility impairment, as well as present the initial key results, observations, and related uncertainties associated with the quantitative analyses performed. These draft documents were made available on September 8, 2009, through the Agency’s Technology Transfer Network (TTN) Web site at [http://www.epa.gov/ttn/naaqs/standards/pm/s\\_pm\\_index.html](http://www.epa.gov/ttn/naaqs/standards/pm/s_pm_index.html). These documents may be accessed in the “Documents from Current Review” section under “Risk and Exposure Assessments.” The EPA is soliciting advice and recommendations from the CASAC by means of a review of the draft documents at an upcoming public meeting of the CASAC scheduled in Chapel Hill, NC. Information about this public meeting was published as a separate notice in the **Federal Register** on September 10, 2009 (74 FR 46586). Following the CASAC meeting, EPA will consider comments received from the CASAC and the public in preparing revisions to these assessment documents.

In addition, on September 16, 2009, EPA made available a third draft document titled, *Policy Assessment for the Review of the National Ambient Air Quality Standards: Preliminary Draft*. The development of this document is a result of recent changes to the NAAQS review process. On May 21, 2009, Administrator Jackson called for key changes to the NAAQS review process including reinstating a policy assessment document that contains staff analyses of the scientific bases for alternative policy options for consideration by senior Agency management prior to rulemaking. This document, which builds upon the historical “Staff Paper,” will serve to “bridge the gap” between the scientific information and the judgments required of the Administrator in determining whether it is appropriate to retain or revise the standards. In conjunction

with this change, EPA will no longer issue a policy assessment in the form of an Advance Notice of Proposed Rulemaking (ANPR).<sup>4</sup>

The preliminary draft Policy Assessment (PA) builds upon information presented in the *Integrated Science Assessment for Particulate Matter* (Second External Review Draft)<sup>5</sup> and the two draft assessment documents described above. This preliminary draft PA includes several chapters but is not intended to be a complete draft PA document in that it does not include staff conclusions on a range of policy options that could be appropriate for the Administrator to consider concerning whether, and if so how, to revise the primary and secondary PM NAAQS. It is instead being released for informational purposes to facilitate a discussion with CASAC on the overall structure, areas of focus, and level of detail to be included in an external review draft of the document, which EPA plans to release for CASAC review and public comment later this year.

The preliminary draft PA may be accessed online through EPA’s TTN Web site at [http://www.epa.gov/ttn/naaqs/standards/pm/s\\_pm\\_index.html](http://www.epa.gov/ttn/naaqs/standards/pm/s_pm_index.html). This document may be accessed in the “Documents from Current Review” section under “Policy Assessments.” The discussion with CASAC on this preliminary draft PA will be held at the same meeting that CASAC will review the second draft Integrated Science Assessment (ISA) and the two draft assessment documents described above.

The draft documents briefly described above do not represent and should not be construed to represent any final EPA policy, viewpoint, or determination. The EPA will consider any public comments submitted in response to this notice when revising the documents.
