

k. *Deadline for Filing Responsive Documents:* The Commission directs, pursuant to section 4.34(b) of the Regulations (see Order No. 533, issued May 8, 1991, 56 FR 23,108 (May 20, 1991)) that all comments, motions to intervene, protests, recommendations, terms and conditions, and prescriptions concerning the application be filed with the Commission by December 1, 2009. The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person in the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

l. *Description of Project:* The proposed project will generate electricity from existing water supply operations flowing through the buried 96-inch diameter Los Vaqueros pipeline, located at elevation of 220 feet, to the Contra Costa Canal, located at elevation 120 feet. A small hydroelectric generating facility, consisting of a 1-megawatt turbine-generating unit, will be built near where the Los Vaqueros pipeline ends into the Contra Costa Canal.

The project would have an estimated annual generation of 4,400,000 kWh (kilowatt-hours). The applicant plans to use most of the generated energy.
