SUPPLEMENTARY INFORMATION:

I. Background

Section 115 (e) of the Federal Mine Safety and Health Act of 1977 (Mine Act) required the Secretary of Labor (Secretary) to publish proposed regulations which provide that mine rescue teams be available for rescue and recovery work to each underground mine in the event of an emergency. In addition, the costs of making advance arrangements for such teams are to be borne by the operator of each such mine.

Congress considered the ready availability of mine rescue in the event of an accident to be vital protection for miners. Congress was concerned that too often in the past, rescue efforts at a disaster site have had to await the delayed arrival of skilled mine rescue teams. In responding to Congressional concerns, the Mine Safety and Health Administration (MSHA) promulgated 30 CFR Part 49, Mine Rescue Teams. The regulations set standards related to the availability of mine rescue teams; alternate mine rescue capability for small and remote mines and mines with special mining conditions; inspection and maintenance records of mine rescue equipment and apparatus; physical requirements for mine rescue team members and alternates; and experience and training requirements for team members and alternates.

II. Desired Focus of Comments

MSHA is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

A copy of the proposed information collection request can be obtained by contacting the employee listed in the For Further Information Contact section of this notice, or viewed on the internet by accessing the MSHA home page

(<http://www.msha.gov/>) and selecting "Rules & Regs", and then selecting "FedReg. Docs". On the next screen, select "Paperwork Reduction Act Supporting Statement" to view documents supporting the **Federal Register** Notice.

Current Actions

Under 30 CFR part 49, Mine Rescue Teams, the regulations set standards related to the availability of mine rescue teams; alternate mine rescue capability for small and remote mines and mines with special mining conditions; inspection and maintenance records of mine rescue equipment and apparatus; physical requirements for mine rescue team members and alternates; and experience and training requirements for team members and alternates. Parts 75 and 77 requires that coal mine operators make arrangements with a licensed physician, medical service, medical clinic, or hospital and with an ambulance service to provide 24-hour emergency medical assistance and transportation. That information is to be posted at the mine.
