

NATIONAL SCIENCE FOUNDATION**Proposal Review Panel for Physics;
Notice of Meeting**

In accordance with the Federal Advisory Committee Act (Pub. L. 92-463, as amended), the National Science Foundation announces the following meeting.

Name: Rutgers University Site Visit (1208).
Date and Time: Tuesday, October 27, 2009; 8 a.m.–5 p.m. Wednesday, October 28, 2009; 8 a.m.–1 p.m.

Place: Rutgers University, Piscataway, NJ.
Type of Meeting: Partially Closed.
Contact Person: Dr. James Reidy, Program Director for Elementary Particle Physics, National Science Foundation, 4201 Wilson Blvd., Arlington, VA 22230. Telephone: (703) 292-7392.

Purpose of Meeting: To provide an evaluation concerning the proposal submitted to the National Science Foundation.

Agenda:

Tuesday, October 27, 2009

Open: 0800–0930—Orientation, Introduction of Panel, Welcome; 0930–1145—Tevatron presentations.

Closed: 1145–0100—Meeting with the Department Chair, Dean, and Students; 0100–0130—Executive Session.

Open: 0130–0230—CMS—M&O/PLT presentations; 0245–0300—Computing and Networks; 0315–0415—CMS and Facilities Tour.

Closed: 0415–0600—Executive Session.

Wednesday, October 27, 2009

Open: 0745–1015—CMS Physics Presentations.

Closed: 1015–0100—Executive Session.

Reason for Closing: The proposal contains proprietary or confidential material, including technical information on personnel. These matters are exempt under 5 U.S.C. 552b(c)(2)(4) and (6) of the Government in the Sunshine Act.

Dated: October 9, 2009.

Susanne Bolton,

Committee Management Officer.

BILLING CODE 7555-01-P

**NUCLEAR REGULATORY
COMMISSION**

[NRC-2009-0440; Docket No. 40-8989]

**Issuance of Environmental
Assessment and Draft Finding of No
Significant Impact for Modification of
Exemption From Certain U.S. Nuclear
Regulatory Commission Licensing
Requirements for Special Nuclear
Material for EnergySolutions LLC,
Clive, UT; Correction**

AGENCY: Nuclear Regulatory Commission.

ACTION: Correction.

SUMMARY: This document corrects a notice appearing in the **Federal Register** on October 7, 2009 (74 FR 51622), in which NRC issues an Environmental Assessment and Draft Finding of No Significant Impact for modification of an exemption from certain NRC licensing requirements for special nuclear material for EnergySolutions, LLC, Clive, UT. This action is necessary to correct an erroneous reference.

FOR FURTHER INFORMATION CONTACT: Michael T. Lesar, Chief, Rulemaking and Directives Branch, Office of Administration, U.S. Nuclear Regulatory Commission, Telephone 301-492-3663, e-mail Michael.Lesar@nrc.gov.

SUPPLEMENTARY INFORMATION: In FR Doc. E9-24208, published on October 7, 2009, on page 51622, in the center column, in the SUMMARY paragraph, 22nd line, “WCS” is corrected to read “EnergySolutions”.

Dated at Rockville, Maryland, this 9th day of October 2009.

For the Nuclear Regulatory Commission.

Michael T. Lesar,

Chief, Rules and Directives Branch, Office of Administration.

BILLING CODE 7590-01-P

**NUCLEAR REGULATORY
COMMISSION**

[Docket No. 70-7005; NRC-2009-0283]

**Issuance of Environmental
Assessment and Final Finding of No
Significant Impact for Modification of
Exemption From Certain NRC
Licensing Requirements for Special
Nuclear Material for Waste Control
Specialists, LLC, Andrews County, TX**

AGENCY: Nuclear Regulatory Commission.

ACTION: Environmental Assessment and Final Finding of No Significant Impact.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) has prepared an Environmental Assessment for the issuance of an Order under Section 274(f) of the Atomic Energy Act that would modify an Order issued to Waste Control Specialists, LLC (WCS) on November 5, 2004. In accordance with 10 CFR 51.33, the NRC prepared a draft Finding of No Significant Impact (FONSI) for public review and comment that was issued on July 9, 2009 (74 FR 34983). The public comment period closed on August 10, 2009. NRC received comments from one resident of Texas. The current action is in response

to a request by WCS dated December 10, 2007. The November 5, 2004 Order was published in the **Federal Register** on November 12, 2004 (69 FR 65468). The November 5, 2004 Order, which modified an initial Order issued to WCS on November 21, 2001, exempted WCS from certain NRC regulations and permitted WCS, under specified conditions, to possess waste containing special nuclear material (SNM), in greater quantities than specified in 10 CFR Part 150, at WCS's facility located in Andrews County, Texas, without obtaining an NRC license pursuant to 10 CFR part 70.

FOR FURTHER INFORMATION CONTACT: Nishka Devaser, Project Manager, Environmental and Performance Assessment Directorate, Division of Waste Management and Environmental Protection, Office of Federal and State Materials and Environmental Management Programs, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Telephone: (301) 415-5196; Fax number: (301) 415-5369; e-mail: nishka.devaser@nrc.gov.

NRC's Agency-Wide Documents Access and Management System (ADAMS): Publicly available documents created or received at the NRC are available electronically at the NRC's Electronic Reading Room at <http://www.nrc.gov/reading-rm/adams.html>. From this page, the public can gain entry into ADAMS, which provides text and image files of NRC's public documents. If you do not have access to ADAMS or if there are problems in accessing the documents located in ADAMS, contact the NRC's Public Document Room reference staff at 1-899-397-4209, 301-415-4737, or by e-mail to pdr.resource@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Environmental Assessment*Background*

As stated above, the 2004 Order exempted WCS from certain NRC regulations and permitted WCS, under specified conditions, to possess waste containing SNM, in greater quantities than specified in 10 CFR Part 150, at WCS's facility located in Andrews County, Texas, without obtaining a NRC license pursuant to 10 CFR part 70. The 2004 Order permits WCS to possess SNM without regard for mass. Rather than relying on mass to ensure criticality safety, concentration-based limits were applied, such that accumulations of SNM at or below these concentration limits would not pose a criticality safety concern. The methodology used to establish these limits is discussed in two Safety
