[Project No. 13556-000]

Montana Department of Natural Resources and Conservation; Notice of Competing Preliminary Permit Application Accepted for Filing and Soliciting Comments and Motions To Intervene

October 19, 2009.

On July 16, 2009, the Montana Department of Natural Resources and Conservation (MDNRC) filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act, proposing to study the feasibility of the Tongue River Power Project, which would be located at the existing Tongue River Reservoir Dam on the Tongue River, in Big Horn County, Montana. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project would use the existing 93-foot-high, 1,824-foot-long earthen dam with spillway, and the existing 765-foot-long, 16-foot-diameter horseshoe-shaped auxiliary outlet conduit. MDNRC proposes to construct and install: (1) A new 8-foot-diameter, 765-foot-long steel liner in the existing auxiliary outlet conduit; (2) a new 8-foot-diameter, 400-foot-long steel penstock extending to a bifurcation; (3) a new 8-foot-diameter, 60-foot-long steel penstock extending from the bifurcation to the powerhouse; (4) a new 8-foot-diameter, 60-foot-long steel conduit extending from the bifurcation to an energy dissipation structure for excess flows and bypass during turbine outages; (5) a new powerhouse containing two generating units with a combined installed capacity of 3,000 kilowatts, discharging flows into the Tongue River; (6) a new substation next to the powerhouse; (7) a new 25-kilovolt, 0.75-mile-long transmission line; (8) a new switchyard at the interconnection point with the local grid; and (9) appurtenant facilities. The proposed project would have an average annual generation of 11.5 gigawatt-hours.
