Background

Customs and Border Protection (CBP) published a document in the **Federal Register** (74 FR 52928) on October 15, 2009 proposing to amend title 19 of the Code of Federal Regulations to preclude the filing of substitution drawback claims for internal revenue excise tax paid on imported merchandise in situations where no excise tax was paid upon the substituted merchandise or where the substituted merchandise is the subject of a different claim for refund or drawback of excise tax under any provision of the Internal Revenue Code. The document solicited public comment on the proposed amendments, and requested that submitted comments be received by CBP on or before November 16, 2009.

A related proposed rulemaking prepared by the Alcohol and Tobacco Tax and Trade Bureau (TTB) within the Department of the Treasury was published in the same edition of the **Federal Register** (74 FR 52937, October 15, 2009). Comments on TTB's proposed rule are due on or before December 14, 2009.

Extension of Comment Period

On October 21, 2009, CBP received a written submission from the trade requesting that the 30-day comment period be extended to align with the 60-day period designated in the TTB proposed rule so as to provide adequate time to prepare comments. Upon review, a decision has been made to grant the request in order to provide the public with equal opportunity to comment on the related proposals. Accordingly, the comment period is extended to December 14, 2009, and comments must be received by CBP on or before that date.

The EPA will make every effort to accommodate all speakers that arrive and register before 7 p.m. A lunch break is scheduled from 12:30 p.m. until 2 p.m. during both hearings. Questions concerning the October 27, 2009, proposed rule should be addressed to Mr. Joseph Mangino, U.S.

EPA, Office of Air Quality Planning and Standards, Operating Permits Group, (C504-05), Research Triangle Park, NC 27711, telephone number (919) 541-9778, e-mail at mangino.joseph@epa.gov.

SUPPLEMENTARY INFORMATION: The October 27, 2009, notice of proposed rulemaking proposes to tailor the major source applicability thresholds for greenhouse gas (GHG) emissions under the Prevention of Significant Deterioration (PSD) and title V programs of the Clean Air Act (CAA or Act) and to set a PSD significance level for GHG emissions. This proposal is necessary because EPA expects soon to promulgate regulations under the CAA to control GHG emissions and, as a result, trigger PSD and title V applicability requirements for GHG emissions. If PSD and title V requirements apply at the applicability levels provided under the CAA, State permitting authorities would be paralyzed by permit applications in numbers that are orders of magnitude greater than their current administrative resources could accommodate. On the basis of the legal doctrines of "absurd results" and "administrative necessity," this proposed rule would phase in the applicability thresholds for both the PSD and title V programs for sources of GHG emissions. The first phase, which would last 6 years, would establish a temporary level for the PSD and title V applicability thresholds at 25,000 tons per year (tpy), on a "carbon dioxide equivalent" (CO₂e) basis, and a temporary PSD significance level for GHG emissions of between 10,000 and 25,000 tpy CO₂e. EPA would also take other streamlining actions during this time. Within 5 years of the final version of this rule, EPA would conduct a study to assess the administrability issues. Then, EPA would conduct another rulemaking, to be completed by the end of the sixth year, that would promulgate, as the second phase, revised applicability and significance level thresholds and other streamlining techniques, as appropriate.

Public hearing: The proposal for which EPA is holding the public hearings was published in the **Federal Register** on October 27, 2009, (74 FR 55292) and is available at: <http://www.epa.gov/nsr> and also in the docket identified below. The public hearings will provide interested parties the opportunity to present data, views, or arguments concerning the proposal. The EPA may ask clarifying questions during the oral presentations, but will not respond to the presentations at that time. Written statements and supporting
