SUPPLEMENTARY INFORMATION:

I. Background

The Alien Medical Records system of records is maintained by the Department of Homeland Security (DHS) U.S. Immigration and Customs Enforcement (ICE) Division of Immigration Health Services (DIHS), a division within the Office of Detention and Removal Operations (DRO). As noted above, the information described in this notice was previously covered by the Department of Health and Human Services (HHS) 9-15-0002 Patients Medical Record System Public Health Service Hospitals HHS/HRSA/BPHC System of Records (August 3, 2009, 74 FR 38456). This system of records maintains medical, mental health, and dental records that document the medical screening, examination, and treatment of aliens whom ICE arrests and detains for violations of the Immigration and Nationality Act (INA). The records contain the medical information for aliens detained in facilities owned and operated by ICE or its contractors, or in other facilities for ICE detainees where medical care is provided by ICE DIHS. It also maintains information about prisoners of the U.S. Marshals Service (USMS) who are housed in a detention facility operated by or on behalf of ICE pursuant to an agreement between the USMS and ICE. The system of records also supports the dissemination of medical information about these individuals in the case of infectious diseases especially in the event of a public health emergency, such as an epidemic or pandemic.

Before October 1, 2007, DHS and HHS maintained annual interagency agreements through which ICE DIHS, a component of HHS's Health Resources and Services Administration (HRSA), provided health care for ICE detainees. Medical records created by HRSA in providing those services were covered under a HHS Privacy Act system of records notice titled HHS 9-15-0002 Patients Medical Record System Public Health Service Hospitals HHS/HRSA/BPHC System of Records (August 3, 2009, 74 FR 38456). On August 23, 2007, a new agreement between DHS and HHS was signed to facilitate the transfer of the Federal detainee health care program responsibilities from HHS to DHS and detailed Public Health Service Commissioned Corps Officers to DHS on an open-ended basis to provide medical care for ICE detainees. HRSA has disbanded its DIHS, and ICE has

created a component within its DRO known as DIHS. ICE's DIHS now provides health services to ICE detainees through the detailed Public Health Service Commissioned Corps Officers from HHS and through other contracted medical professionals. With the transfer of this function, ICE now owns the medical records created by DIHS personnel and contracted medical professionals. This transfer of record ownership requires that ICE publish this system of records notice under the Privacy Act describing for the public the medical records it owns and maintains.

The medical services provided to ICE detainees include medical, mental health, and dental care. If a detainee needs care that the medical staff in the detention facility cannot provide, such as meeting with a specialist or receiving a medical procedure in a hospital or in an in-patient or out-patient facility, the medical staff makes arrangements to procure the consultation, treatment, or procedure. For each category of individuals described in this notice, ICE maintains medical records that document the person's health, including symptoms, diseases and conditions, treatments received, and medications prescribed. This information is typically shared with other health care providers to ensure continuity of care. For individuals with infectious diseases of public health significance, this information may be shared with public health officials in order to prevent exposure to or transmission of the disease.

Consistent with DHS's information sharing mission, information stored in the DHS/ICE-013 Alien Medical Records System of Records may be shared with other DHS components, as well as appropriate Federal, State, local, tribal, foreign, or international government agencies. This sharing will only take place after DHS determines that the receiving component or agency has a need to know the information to carry out the purposes of this system of records, including the medical treatment and removal of detainees from the United States.

It is important to note that DHS/ICE/DIHS is not subject to the provisions of the Health Insurance Portability and Accountability Act of 1996 (HIPAA) regulation, "Standards for Privacy of Individually Identifiable Health Information" (Privacy Rule), 45 CFR Parts 160 and 164. DHS/ICE/DIHS does not meet the statutory definition of a covered plan under HIPAA, 42 U.S.C. 1320d(5), and is specifically carved out of the application of HIPAA as a "government funded program whose principal activity is the direct provision

of healthcare to persons." 45 CFR 160.103 (definition of a health plan). Because DHS/ICE/DIHS is not a covered entity, the restrictions proscribed by the HIPAA Privacy Rule are not applicable.

II. Privacy Act

The Privacy Act embodies fair information principles in a statutory framework governing the means by which the United States Government collects, maintains, uses, and disseminates individuals' records. The Privacy Act applies to information that is maintained in a "system of records." A "system of records" is a group of any records under the control of an agency for which information is retrieved by the name of an individual or by some identifying number, symbol, or other identifying particular assigned to the individual. In the Privacy Act, an individual is defined to encompass United States citizens and lawful permanent residents. As a matter of policy, DHS extends administrative Privacy Act protections to all individuals where systems of records maintain information on U.S. citizens, lawful permanent residents, and visitors. Individuals may request access to their own records that are maintained in a system of records in the possession or under the control of DHS by complying with DHS Privacy Act regulations, 6 CFR Part 5.

The Privacy Act requires each agency to publish in the **Federal Register** a description denoting the type and character of each system of records that the agency maintains, and the routine uses that are contained in each system in order to make agency recordkeeping practices transparent, to notify individuals regarding the uses to which their records are put, and to assist individuals to more easily find such files within the agency. Below is the description of the DHS/ICE-013 Alien Medical Records System of Records.

In accordance with 5 U.S.C. 552a(r), DHS has provided a report of this system of records to the Office of Management and Budget and to Congress.

SUPPLEMENTARY INFORMATION:

I. Background

The Department of Homeland Security (DHS) U.S. Coast Guard (USCG) is revising a system of records under the Privacy Act of 1974 (5 U.S.C. 552a), for the DHS/USCG—060 Homeport System of Records. The Department is updating and reissuing the DHS/USCG—060 Homeport System of Records (71 FR 25203, April 28, 2006) to cover inclusion of these updated records. The collection and maintenance of this information will assist the USCG in meeting its maritime security requirements under the Maritime Transportation Security Act (MTSA) of 2002.

MTSA establishes a comprehensive national system of transportation security enhancements to protect America's maritime community against the threat of terrorism without adversely affecting the flow of commerce through United States ports. The USCG is the lead Federal agency for coordinating and implementing maritime security and has significant enforcement responsibilities under the MTSA. Among other responsibilities under MTSA, the USCG requires that maritime security plans be developed by maritime private sector industry for ports, vessels, and facilities. Additionally, the DHS/USCG—060 Homeport System of Records will be used for a limited set of individuals for the Transportation Worker Identification Credential (TWIC)
