Administration for Children and Families

Proposed Information Collection Activity; Comment Request

Title: Evaluation of Adolescent Pregnancy Prevention Approaches—Baseline Data Collection.

OMB No.: 0970-0360.

Description: The Administration for Children and Families (ACE), U.S. Department of Health and Human Services (HHS), is proposing a data collection activity as part of the Evaluation of Adolescent Pregnancy Prevention Approaches (PPA). PPA is being undertaken to expand available evidence on effective ways to prevent teen pregnancy. The evaluation will document and test a range of pregnancy prevention approaches in up to eight program sites. Program impacts will be estimated using a random assignment design, involving random assignment at the school, individual, or other level, depending on the program setting. The findings of the evaluation will be of interest to the general public, to policy-makers, and to organizations interested in teen pregnancy prevention.

This proposed information collection activity focuses on collecting baseline data from a self-administered questionnaire which will be used to perform meaningful analysis to determine significant program effects. Through a survey instrument, respondents will be asked to answer carefully selected questions about demographics and risk and protective factors related to teen pregnancy.

Respondents: Study participants, *i.e.* adolescents assigned to a select school or community teen pregnancy prevention program or a control group.
