Notice of Opportunity for Public Comment on the Proposed Model Safety Evaluation for Plant-Specific Adoption of Technical Specification Task Force Traveler-493, Revision 4, "Clarify Application of Setpoint Methodology for LSSS Functions"

AGENCY: Nuclear Regulatory Commission (NRC).

ACTION: Notice of opportunity for public comment.

SUMMARY: The NRC is requesting public comment on the enclosed proposed model application, model no significant hazards consideration determination, and model safety evaluation for plant-specific adoption of Technical Specification Task Force (TSTF) Traveler-493, Revision 4, "Clarify Application of Setpoint Methodology for LSSS Functions." The TSTF Traveler-493, Revision 4, is available in the Agencywide Documents Access and Management System (ADAMS) under Accession Number ML092150990. The proposed changes revise Standard

Technical Specifications (STS) with respect to limiting safety system settings (LSSSs) assessed during periodic testing and calibration of instrumentation that may have an adverse effect on equipment operability. This model safety evaluation will facilitate expedited approval of plant-specific adoption of TSTF Traveler-493, Revision 4.

DATES: Comment period expires November 25, 2009. Comments received after this date will be considered, if it is practical to do so, but the Commission is able to ensure consideration only for comments received on or before this date.

The NRC requests that any party soliciting or aggregating comments received from other persons for submission to the NRC inform those persons that the NRC will not edit their comments to remove any identifying or contact information, and therefore, they should not include any information in their comments that they do not want publicly disclosed.
