The Proposal

The FAA is proposing an amendment to Title 14 Code of Federal Regulations (14 CFR) part 71 by modifying Class E airspace at Astoria Regional Airport, Astoria, OR. Controlled airspace is necessary to accommodate aircraft using the new RNAV (GPS) SIAP at Astoria Regional Airport, Astoria, OR. This action would enhance the safety and management of aircraft operations at Astoria Regional Airport, Astoria, OR. This will also correct the name from Port of Astoria Airport.

Class E airspace designations are published in paragraph 6002 and 6005, respectively, of FAA Order 7400.9T, signed August 27, 2009, and effective September 15, 2009, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in this Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation; (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the U.S. Code. Subtitle 1, Section 106, describes the authority for the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it establishes

additional controlled airspace at Astoria Regional Airport, Astoria, OR.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

1. The authority citation for 14 CFR part 71 continues to read as follows:

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of the FAA Order 7400.9T, Airspace Designations and Reporting Points, signed August 27, 2009, and effective September 15, 2009 is amended as follows:

Emissions Factors Program Improvements

AGENCY: Environmental Protection Agency (EPA).

ACTION: Advanced notice of proposed rulemaking (ANPRM); extension of public comment period.

SUMMARY: On October 14, 2009, EPA published an Emissions Factors Program Improvements ANPRM to convey issues raised by stakeholders about the program, inform the public of our initial ideas to address these issues, and solicit comments on our current thinking to resolve these issues. EPA has received several requests from stakeholders to grant additional time to provide comments on the ANPRM. Given that EPA published the ANPRM specifically to obtain public comments on the emissions factors program and the potential improvements to the program, EPA finds this request to be reasonable. Thus, the comment period is being extended 30 additional days to December 14, 2009.
