

American Reinvestment and Recovery Act of 2009, Pub. L. No. 111–5.

Total Annual Burden: 1,683 hours.

Privacy Act Impact Assessment: No personally identified information will be transmitted to the Commission from the survey contractor as a matter of vendor policy.

Nature and Extent of Confidentiality: There is no need for confidentiality.

Need and Uses: The Broadband Data Improvement Act of 2008, Pub. L. No. 110–385, Stat 4096 § 103(c)(1) directs the Commission to collect the information on the types of technology used to provide broadband to consumers, the price of such services, actual data transmission speeds, and the reasons for non-adoption of broadband service.

The Commission requested emergency OMB approval in October for this new information collection. The Commission received OMB approval on October 19, 2009. The Commission is now requesting an extension (no change in the reporting requirement) in order to obtain the full three year clearance from the OMB.

This collection of information will be accomplished through a national telephone survey of 5,000 consumers and face-to-face workshops with approximately 100 individuals throughout the United States. Consistent with one of the key reasons for this information collection, workshop participants will be non-adopters of broadband. The reason for holding these workshops is to elicit more in-depth responses from individuals to the questions being asked of non-adopters in the telephone survey. The workshops will add a narrative dimension to the reasons for non-adoption to the statistical information being collected in the telephone survey.

The Commission's Office of Strategic Planning (OSP) will use the information collected under this survey to help determine the extent of broadband Internet adoption, and use the data to inform policy recommendations under the National Broadband Plan. Information on consumers without broadband Internet at home will be used to carefully identify the nature and extent of the problem and used to develop policy recommendations through the National Broadband Plan which is due to congress by February 17, 2010.
