

graded to final contours, dressed to eliminate low areas, and opened for use by the public. Support equipment will be shifted out of completed sections as soon as practicable, so that construction activities in a particular reach will not disrupt normal beach use for only a month or so at any locality. The finished sections will be allowed to adjust to natural processes for several months. The final process will include the placement of dune fencing and/or dune plantings as needed or required.

4. *Alternatives.* An extensive alternatives analysis was performed and reviewed for this project. This included the evaluation of a no action alternative; a retreat and relocate alternative; and the preferred alternative. Many alternatives were identified and evaluated through the scoping process, and further detailed descriptions of all alternatives is disclosed in Section 5.0 of the Draft EIS.

5. *Scoping Process.* A public scoping meeting was held on April 28, 2009 and public and agency comments were solicited for input in the preparation of the Draft EIS. The scoping meeting was well attended by the public, as well as representatives from local, State, and Federal governmental agencies.

The COE coordinated closely with the North Carolina Division of Coastal Management, the U.S. Fish and Wildlife Service, and the National Marine Fisheries Service in the development of the Draft EIS to ensure the process complies with State Environmental Policy Act (SEPA) requirements, as well as the NEPA requirements. The Draft EIS has been designed to consolidate both NEPA and SEPA processes, but the State of North Carolina will administer their own Coastal Zone Management Permit process.
