Title: NESHAP for Miscellaneous Organic Chemical Manufacturing (Renewal).

ICR Numbers: EPA ICR Number 1969.04, OMB Control Number 2060-0533.

ICR Status: This ICR is schedule to expire on December 31, 2009. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for the regulations published at 40 CFR part 63, subpart FFFF were proposed on April 4, 2002, and promulgated on November 10, 2003. These regulations apply to new and existing facilities that manufacture a miscellaneous organic chemical and are located at, or are part of, major sources of hazardous air pollutant (HAP) emissions. New facilities include those that commenced construction or reconstruction after the date of proposal. This information is being collected to assure compliance with 40 CFR part 63, subpart FFFF.

In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NESHAP. Semiannual reports are also required.

Any owner or operator subject to the provisions of this subpart must maintain a file of these measurements, and retain the file for at least five years following the collection of such measurements, maintenance reports, and records.

All reports are sent to the delegated state or local authority. In the event that there is no such delegated authority, the

reports are sent directly to the EPA regional office. This information is being collected to assure compliance with 40 CFR part 63, subpart FFFF, as authorized in sections 112 and 114(a) of the Clean Air Act. The required information consists of emissions data and other information that has been determined to be private.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information estimated to average 254 hour per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose and provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information. All existing ways will have to adjust to comply with any previously applicable instructions and requirements that have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Miscellaneous organic chemical manufacturing.

Estimated Number of Respondents: 257.

Frequency of Response: Initially, occasionally and semiannually.

Estimated Total Annual Hour Burden: 416,830.

Estimated Total Annual Cost: \$41,436,793, which includes \$35,303,884 in labor costs, \$670,256 capital/startup costs and \$5,462,653 in operation and maintenance (O&M) costs.

Changes in the Estimates: There is no change in the labor hours in this ICR as compared to the previous one. This is due to two considerations: (1) The regulations have not changed over the past three years and are not anticipated to change over the next three years; (2) the growth rate for the industry is very low, negative or nonexistent, so there is no significant change in the overall burden. Some insignificant reporting errors were corrected in this ICR.

Dated: November 16, 2009.

John Moses,

Director, Collection Strategies Division.
