**Title:** Unregulated Contaminant Monitoring in Public Water Systems (Renewal).

**ICR numbers:** EPA ICR No. 2192.03, OMB Control No. 2040-0270.

**ICR Status:** This ICR is scheduled to expire on November 30, 2009. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

**Abstract:** The Safe Drinking Water Act (SDWA), as amended in 1996, directs EPA to establish criteria for a program to monitor not more than 30 unregulated contaminants every five years. EPA published the first group of contaminants in the Unregulated Contaminant Monitoring Regulation (*i.e.*, UCMR 1), which established a revised approach for UCMR implementation, in the **Federal Register** dated September 17, 1999, (64 FR 50556). EPA published the second group of contaminants in UCMR 2, in the **Federal Register** dated January 4, 2007, (72 FR 367). This regulation met the SDWA requirement by identifying 25 new priority contaminants to be monitored during the UCMR 2 cycle of 2007-2011.

Under UCMR 2, Assessment Monitoring uses more common analytical method technologies used by drinking water laboratories. All public

water systems (PWSs) serving more than 10,000 people, and 800 representative PWSs serving fewer than 10,001 people are required to monitor for the 10 "List 1" contaminants during a 12-month period between January 2008–December 2010. Screening Survey monitoring uses more specialized analytical method technologies not as widely used by drinking water laboratories. All PWSs serving more than 100,000 people, 320 representative PWSs serving 10,001–100,000 people, and 480 representative PWSs serving fewer than 10,001 people are required to monitor for the 15 "List 2" contaminants during a 12-month period between January 2008–December 2010.

This notice proposes renewal of the currently approved UCMR 2 ICR (OMB Control No. 2040–0270), which covers the period of 2007–2009. This ICR renewal accounts for activities over a three-year period (2010–2012), as is customary. Note that the complete five-year UCMR 2 cycle of 2007–2011 overlaps with the applicable ICR renewal period only during 2010 and 2011. Public water systems will only be involved in active monitoring during 2010 (i.e., one-third of this ICR period), with reporting continuing into 2011 for some.

**Burden Statement:** The annual public reporting and recordkeeping burden for this collection of information is estimated to average 5.8 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

**Respondents/Affected Entities:** Public water systems.

**Estimated Number of Respondents:** 1,694 (1,638 PWSs and 56 State primacy agencies).

**Frequency of Response:** On Occasion.

**Estimated Total Annual Hour Burden:** 9,761.

**Estimated Total Annual Cost:** \$3,250,616 includes an estimated labor cost of \$387,096 and \$2,863,520 for

capital and operation & maintenance costs.

**Changes in the Estimates:** There is decrease of 30,625 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This decrease is due to the fact that the complete five-year UCMR 2 cycle of 2007–2011 overlaps with the applicable ICR renewal period only during 2010 and 2011. In this time, there will be fewer PWSs participating and the schedule of activities will have changed.

Dated: November 16, 2009.
