

2009). On August 12, 2009, NTIA issued a clarification of the information collection requirements in the NOFA (See 74 FR 40569, Aug. 12, 2009). On September 10, 2009, NTIA issued an additional clarification announcing that NTIA will initially fund mapping and data collection efforts for two years to enable the agency to assess lessons learned, determine best practices, and investigate opportunities for improved data collection prior to obligating funding for subsequent years (See 74 FR 46573, Sept. 10, 2009). Applications for the grant program were received until August 14, 2009 and NTIA received applications representing all 50 States, 5 territories, and the District of Columbia.

Each applicant for program funding submitted an application, on standard OMB-approved forms, proposing data collection through five years and providing five-year budgets. Applicants provided comprehensive descriptions of their plans to obtain and verify required data from all commercial or public providers in their respective states. Data collection and verification methods may vary between applicants and may include online and on-the-ground surveys of providers and the public, Web-enabled data searches, statistical modeling, drive testing of spectrum use and crowd-sourced data reporting. Data must be collected at least semiannually and initial data collection is due on February 1, 2010. On October 5, 2009, NTIA announced that it awarded the first four grants under the SBDD program to fund data collection in California, Indiana, North Carolina, and Vermont.
