AGENCY: Employment and Training Administration, Labor.

ACTION: Notice.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden conducts a preclearance consultation program to provide the general public, State, and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA95) [44 U.S.C. 3506(c)(2)(A)]. SUPPLEMENTARY INFORMATION:

I. Background

The Worker Profiling and Reemployment Services (WPRS) program allows for the targeting of reemployment services to those most likely to exhaust their benefits. The ETA 9048 and ETA 9049 are the only means of tracking the activities in the WPRS program. The ETA 9048 reports on the numbers and flows of claimants at the various stages of the WPRS system from initial profiling through the completion of specific reemployment services. This allows for evaluation and monitoring of the program. The ETA 9049 gives a limited, but inexpensive, look at the reemployment experience of profiled claimants who were referred to services by examining the State's existing wage record files to identify the subsequent quarter in which the referred individuals became employed, what wages they earned and whether they have changed industries.

II. Review Focus

The Department of Labor is particularly interested in comments which:

- * Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- * Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information,

including the validity of the methodology and assumptions used;

- * Enhance the quality, utility, and clarity of the information to be collected; and
- * Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.
