

waste as would be the case with the other waste to be treated in each alternative; it would thus not be shipped to WIPP for disposal. Ecology, a cooperating agency on this EIS, has requested the following modification to its Foreword in response to that change:

Ecology acknowledges that subsequent to publishing the draft EIS, DOE has revised its preferred alternative to propose that waste from specific Hanford tanks containing what DOE believes might be mixed TRU waste be treated at Hanford through the WTP. This change does not alter Ecology's expectations concerning this waste. Because Ecology has had, and continues to have, legal and technical concerns with any Hanford tank waste being classified as mixed TRU waste, Ecology has always assumed that the waste would be treated at Hanford through the WTP. Ecology expects that the end date for completing treatment of Hanford's tank waste will not be altered by treating the waste from these specific tanks through the WTP.

Regarding DOE's preferred alternative for waste management, (Section S.7.3 of the Summary and Section 2.12 of the main volume) DOE would not send LLW and MLLW from other DOE sites to Hanford for disposal (with some limited specific exceptions) at least until the WTP is operational, consistent with DOE's proposed settlement agreement with the State of Washington. Off-site waste would be addressed after the WTP is operational subject to appropriate NEPA review. Although the Draft EIS considers the cumulative impacts of the potential receipt of GTCC LLW at Hanford, DOE is preparing a separate EIS on GTCC LLW disposition. However, similar to its preference regarding the importation of LLW and MLLW, DOE announces that it does not prefer to import GTCC LLW to Hanford at least until the WTP is operational.
