Oval International, Hoquiam, WA;
Notice of Negative Determination on Reconsideration

On September 29, 2009, the Department issued an Affirmative Determination Regarding Application for Reconsideration for the workers and former workers of the subject firm. The notice was published in the **Federal Register** on October 20, 2009 (74 FR 53763).

The initial investigation resulted in a negative determination based on the finding that imports of pulp bale strapping machines and spare parts did not contribute importantly to worker separations at the subject firm and no shift of production to a foreign source occurred. The “contributed importantly” test is generally demonstrated through a survey of the workers’ firm’s declining domestic customers. The survey of the major declining customers revealed no imports of pulp bale strapping machines and spare parts 2007, 2008 and January through March 2009. The subject firm reported declining imports of pulp bale strapping machines and spare parts during the relevant period.

In the request for reconsideration, the petitioner stated that workers of the

subject firm were previously certified eligible for Trade Adjustment Assistance (TAA) based on a shift in production to Canada and other offshore locations. The petitioner further stated that since the production shift, workers of the subject firm “mainly dealt with sales, service, production and distribution of spare parts.” The petitioner also alleged that the company continued shifting production of spare parts abroad and that imports of spare parts increased.

When assessing eligibility for TAA, the Department exclusively considers shift in production and import impact during the relevant period (from one year prior to the date of the petition). The Department of Labor contacted a company official to verify whether Oval International shifted production of spare
