Agency Forms Undergoing Paperwork Reduction Act Review

The Centers for Disease Control and Prevention (CDC) publishes a list of information collection requests under review by the Office of Management and Budget (OMB) in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these requests, call the CDC Reports Clearance Officer at (404) 639–5960 or send an e-mail to omb@cdc.gov. Send written comments to CDC Desk Officer, Office of Management and Budget, Washington, DC 20503 or by fax to (202) 395–5806. Written comments should be received within 30 days of this notice.

PROPOSED PROJECT

Background and Brief Description

In 2007, there were 1505 cases of malaria reported in the U.S. and its territories. Except for one transfusion-related case, all cases in 2007 were imported. Almost all of the imported malaria cases could have been prevented with appropriate malaria prophylactic drug regimens. Achieving appropriate malaria prophylaxis requires knowledge and action by both the traveler and healthcare provider (HCP). There are limited studies on HCP knowledge and practices regarding malaria prophylaxis. We propose an activity to better define the types of HCPs giving pre-travel advice about malaria, their knowledge gaps regarding malaria prophylaxis, and their barriers to appropriate prescription of malaria prophylaxis.

All U.S. travelers with malaria reported in 2010 and their healthcare providers (if one was seen) who provided pre-travel advice will be interviewed by phone. Interviews will take no longer than 15 minutes. Questions to be asked of patients include demographics, knowledge of malaria risks, and use of prophylaxis during their travel. HCPs will be asked about their training, practice type, and knowledge of malaria risk and prevention. Univariate analysis will be done to describe characteristics of HCPs who give inappropriate prescriptions for malaria prophylaxis. Bivariate and multivariate analysis is planned to examine the association between various HCP characteristics and provision of inappropriate (or no) malaria prophylaxis. Findings from this activity will help CDC’s malaria branch with the development and targeting of educational materials for HCPs regarding malaria in travelers.

Information gathered will also guide content of educational and review articles to be published in journals most often read by target HCPs. The total estimated annual burden hours are 220.

There is no cost to respondents.

Substance Abuse and Mental Health Services Administration

Current List of Laboratories Which Meet Minimum Standards To Engage in Urine Drug Testing for Federal Agencies

AGENCY: Substance Abuse and Mental Health Services Administration, HHS.

ACTION: Notice.

SUMMARY: The Department of Health and Human Services (HHS) notifies Federal agencies of the laboratories currently certified to meet the standards of Subpart C of the Mandatory Guidelines for Federal Workplace Drug Testing Programs (Mandatory Guidelines). The Mandatory Guidelines were first published in the Federal Register on April 11, 1988 (53 FR 11970), and subsequently revised in the Federal Register on June 9, 1994 (59 FR 29908), on September 30, 1997 (62 FR 51118), and on April 13, 2004 (69 FR 16644).

A notice listing all currently certified laboratories is published in the Federal Register during the first week of each month. If any laboratory’s certification is suspended or revoked, the laboratory will be omitted from subsequent lists until such time as it is restored to full certification under the Mandatory Guidelines.

If any laboratory has withdrawn from the HHS National Laboratory Certification Program (NCLP) during the past month, it will be listed at the end, and will be omitted from the monthly listing thereafter.

This notice is also available on the Internet at http://www.workplace.samhsa.gov and http://www.drugfreeworkplace.gov.

FOR FURTHER INFORMATION CONTACT: Mrs. Giselle Hersh, Division of Workplace Programs, SAMHSA/CAP, Room 2–1042, One Choke Cherry Road, Rockville, Maryland 20857; 240–276–2600 (voice), 240–276–2610 (fax).

SUPPLEMENTARY INFORMATION: The Mandatory Guidelines were developed in accordance with Executive Order 12564 and section 503 of Public Law 100–71. Subpart C of the Mandatory Guidelines, “Certification of Laboratories Engaged in Urine Drug Testing for Federal Agencies,” sets strict standards that laboratories must meet in order to conduct drug and specimen
validity tests on urine specimens for Federal agencies. To become certified, an applicant laboratory must undergo three rounds of performance testing plus an on-site inspection. To maintain that certification, a laboratory must participate in a quarterly performance testing program plus undergo periodic, on-site inspections.

Laboratories which claim to be in the applicant stage of certification are not to be considered as meeting the minimum requirements described in the HHS Mandatory Guidelines. A laboratory must have its letter of certification from HHS/SAMHSA (formerly: HHS/NIDA) which attests that it has met minimum standards.

In accordance with Subpart C of the Mandatory Guidelines dated April 13, 2004 (69 FR 19644), the following laboratories meet the minimum standards to conduct drug and specimen validity tests on urine specimens:

* The Standards Council of Canada (SCC) voted to end its Laboratory Accreditation Program for Substance Abuse (LAPSA) effective May 12, 1998. Laboratories certified through that program were accredited to conduct forensic urine drug testing as required by U.S. Department of Transportation (DOT) regulations. As of that date, the certification of those accredited Canadian laboratories will continue under DOT authority. The responsibility for...
