

On October 30, 2009, the Commission determined to review the final ID in part and requested briefing on several issues it determined to review, and on remedy, the public interest and bonding. 74 *FR* 57192 (Nov. 4, 2009). The Commission determined to review (1) the finding that the claim term "top layer" recited in claim 1 of the '106 patent means "an outer layer of the chip assembly upon which the terminals are fixed," the requirement that "the 'top layer' is a single layer," and the effect of the findings on the infringement analysis, invalidity analysis and domestic industry analysis; (2) the finding that the claim term "thereon" recited in claim 1 of the '106 patent requires "disposing the terminals on the top surface of the top layer," and its effect on the infringement analysis, invalidity analysis and domestic industry analysis; (3) the finding that the Direct Loading testing methodology employed by Tessera's expert to prove infringement is unreliable; and (4) the finding that the 1989 Motorola OMPAC 68-pin chip package fails to anticipate claims 17 and 18 of the '977 patent. *Id.*

On November 13, 2009, the parties filed written submissions on the issues under review, remedy, the public interest, and bonding. On November 20, 2009, the parties filed response submissions on the issues on review, remedy, the public interest and bonding.

Having examined the record of this investigation, including the ALJ's final ID, the Commission has determined that there is no violation of section 337. Specifically, the Commission has determined to (1) modify the ALJ's construction of the claim terms "top layer" and "thereon" recited in claim 1 of the '106 patent; (2) reverse the ALJ's finding that the accused wBGA products do not meet all of the limitations of the asserted claims of the '106 patent but affirm his finding that there is no infringement due to patent exhaustion; (3) affirm the ALJ's finding that the accused wBGA products do not infringe the asserted claims of the '106 patent; (4) affirm the ALJ's validity and domestic industry analyses pertaining to the asserted claims of the '106 patent; (5) affirm the ALJ's finding that the Direct Loading testing methodology employed by Tessera's expert fails to prove infringement; and (6) affirm the ALJ's finding that the 1989 Motorola OMPAC 68-pin chip package fails to anticipate claims 17 and 18 of the '977 patent under the on-sale bar provision of 35 U.S.C. 102(b), but modify a portion of the ID.

The authority for the Commission's determination is contained in section

337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and in sections 210.42–46 of the Commission's Rules of Practice and Procedure (19 CFR 210.42–46).

By order of the Commission.
