burden hours described above. According to Bureau of Labor Statistics data for 2008 (most recent available whole-year information), the average compensation for producers and distributors in the fuel industry is $27.28 per hour and $9.46 per hour for service station employees; the average compensation for workers in the vehicle industry is $30.18 per hour.

**Non-liquid Alternative Fuels:**

Certification and labeling: Generally, all of the estimated hours except for recordkeeping will be performed by producers and distributors of fuels. Thus, the associated labor costs would be $24,279. [(550 certification hours + 340 labeling hours) × $27.28]

Recordkeeping: Only 1/6 of the total recordkeeping hours will be performed by the producers and distributors of fuels (1/6 of 190 hours = approximately 32 hours; 32 hours × $27.28 = $872.96); the other 5/6 is attributable to service station employees (5/6 of 190 hours = approximately 158 hours; 158 hours × $9.46 = $1,494.68). Thus, the labor cost due to recordkeeping for the entire industry is approximately $2,368 ($872.96 for producers and distributors of fuels + $1,494.68 for service station employees).

The total paperrelated labor cost for the entire industry (Non-liquid alternative fuels) is approximately $26,647 ($24,279 for certification and labeling costs + $2,368 for recordkeeping costs).

**AFV manufacturers:**

The maximum labor cost for the entire industry (AFV manufacturers) is approximately $1,128,370 per year for recordkeeping and producing and posting labels (37,388 hours × $30.18/ hour).

Thus, the estimated total labor cost for both industries for all paperwork requirements is $1,155,017 ($26,647 + $1,128,370) per year, rounded.

(3) Estimated annual non-labor cost burden: $426,251 rounded (includes both Non-liquid Alternative Fuels and AFV Manufacturers).

**Non-liquid Alternative Fuels:**

Staff believes that there are no current start-up costs associated with the Rule, inasmuch as the Rule has been effective since 1995. Industry members, therefore, have in place the capital equipment and means necessary to determine automotive fuel ratings and comply with the Rule. Industry members, however, incur the cost of procuring fuel dispenser and AFV labels to comply with the Rule. The estimated annual fuel labeling cost, based on estimates of 560 fuel dispensers (assumptions: an estimated 20% of 1,400 total fuel retailers need to replace labels in any given year given an approximate five-year life for labels—i.e., 280 retailers—multiplied by an average of two dispensers per retailer) at thirty-eight cents for each label (per industry sources), is $212.8 ($0.38 × 560).

**AFV Manufacturers:**

Here, too, staff believes that there are no current start-up costs associated with the Rule, for the same reasons as stated immediately above regarding the nonliquid alternative fuel industry. However, based on the labeling of an estimated 1,121,153 new and used AFVs each year at thirty-eight cents for each label (per industry sources), the annual AFV labeling cost is estimated to be $426,038.14 ($0.38 × 1,121,153). Thus, the estimated annual nonlabor cost burden associated with the Rule is $426,251 ($212.8 + $426,038.14), rounded.
