

(GTCC) waste and other radioactive materials associated with spent fuel storage at the Calvert Cliffs Independent Spent Fuel Storage Installation (ISFSI), located at the Calvert Cliffs Nuclear Power Plant site in Calvert County, Maryland. If granted, the revised license will authorize the applicant to allow fuel with a higher burnup to be stored at the Calvert Cliffs ISFSI. This application was docketed under 10 CFR Part 72; the ISFSI Docket No. is 72-8 and will remain the same for this action.

An NRC review, documented in a letter to Constellation dated July 21, 2009, found that the application contains sufficient information for the NRC staff to begin its technical review. The Commission will approve the license amendment if it determines that the application meets the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations, including the findings required by 10 CFR 72.40. These findings will be documented in a Safety Evaluation Report. The NRC has completed an environmental evaluation, in accordance with 10 CFR Part 51, and determined that preparation of an environmental impact statement is not warranted because there are no radiological environmental impacts due to granting the approval of the amendment.

II. Opportunity To Request a Hearing

The Commission may issue either a notice of hearing or a notice of proposed action and opportunity for hearing in accordance with 10 CFR 72.46(b)(1) or, if a determination is made that the amendment does not present a genuine issue as to whether public health and safety will be significantly affected, take immediate action on the amendment in accordance with 10 CFR 72.46(b)(2), and provide notice of the action taken and an opportunity for interested persons to request a hearing on whether the action should be rescinded or modified.

III. Further Information

Documents related to this action, including the application for amendment and supporting documentation, are available electronically at the NRC's Electronic Reading Room at <http://www.nrc.gov/reading-rm/adams.html>. From this site, you can access the NRC's Agencywide Document Access and Management System (ADAMS), which provides text and image files of NRC's public documents. The ADAMS accession numbers for the documents related to this notice are: License Amendment Request dated June 15, 2009 (ML091680541) and the acceptance

review letter dated July 21, 2009 (ML092020003). If you do not have access to ADAMS or if there are problems in accessing the documents located in ADAMS, contact the NRC Public Document Room (PDR) Reference staff at 1-800-397-4209, 301-415-4737 or by e-mail to pdr.resource@nrc.gov.

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-293; NRC-2010-0010]

Entergy Nuclear Operations, Inc.; Pilgrim Nuclear Power Station; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (NRC) is considering issuance of an amendment to Title 10 of the *Code of Federal Regulations* (10 CFR) Part 50, Section 50.92, for Facility Operating License No. DPR-35, issued to Entergy Nuclear Operations, Inc. (Entergy or the licensee), for operation of Pilgrim Nuclear Power Station (Pilgrim), located in Plymouth County, MA. Therefore, as required by 10 CFR 51.21, the NRC is issuing this environmental assessment and finding of no significant impact.

Environmental Assessment

Identification of the Proposed Action

The proposed action would revise the names on the plant license to match the names of the new companies. Entergy Nuclear Generation Company would be changed to Enexus Nuclear Pilgrim, LLC. Entergy Nuclear Operations, Inc. would be changed to EquaGen Nuclear LLC.

The proposed action is in accordance with the licensee's application dated September 30, 2008.

The Need for the Proposed Action

The proposed action for changing the name of the licensee results from

restructuring of Entergy Corporation and the creation of Enexus Energy Corporation as consented to by the NRC Order dated July 28, 2008.

Environmental Impacts of the Proposed Action

The NRC has completed its safety evaluation of the proposed action and concludes that: (1) There is a reasonable assurance that the health and safety of the public will not be endangered by operation in the proposed manner, (2) such activities will be conducted in compliance with the Commission's regulations, and (3) the issuance of the amendment will not be inimical to the common defense and security or to the health and safety of the public.

The details of the staff's safety evaluation will be provided in the license amendment that will be issued as part of the letter to the licensee approving the license amendment.

The proposed action will not significantly increase the probability or consequences of accidents. No changes are being made in the types of effluents that may be released off site. There is no significant increase in the amount of any effluent released off site. There is no significant increase in occupational or public radiation exposure. Therefore, there are no significant radiological environmental impacts associated with the proposed action.

With regard to potential non-radiological impacts, the proposed action does not have a potential to affect any historic sites. It does not affect non-radiological plant effluents and has no other environmental impact. Therefore, there are no significant non-radiological environmental impacts associated with the proposed action.

Accordingly, the NRC concludes that there are no significant environmental impacts associated with the proposed action.

Environmental Impacts of the Alternatives to the Proposed Action

As an alternative to the proposed action, the NRC staff considered denial of the proposed action (i.e., the "no-action" alternative). Denial of the application would result in no change in current environmental impacts. The environmental impacts of the proposed action and the alternative action are similar.

Alternative Use of Resources

The action does not involve the use of any different resources than those previously considered in the Final Environmental Statement for Pilgrim, dated January 1972.

Agencies and Persons Consulted

In accordance with its stated policy, on December 15, 2009, the NRC staff consulted with the Massachusetts State official of the Massachusetts Emergency Management Agency regarding the environmental impact of the proposed action. The State official had no comments.

Finding of No Significant Impact

On the basis of the environmental assessment, the NRC concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the NRC has determined not to prepare an environmental impact statement for the proposed action.

For further details with respect to the proposed action, see the licensee's letter dated September 30, 2008, Agencywide Documents Access and Management System (ADAMS) accession number ML082830135. Documents may be examined, and/or copied for a fee, at the NRC's Public Document Room (PDR), located at One White Flint North, Public File Area O1 F21, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records will be accessible electronically from the ADAMS Public Electronic Reading Room on the Internet at the NRC Web site, <http://www.nrc.gov/reading-rm/adams.html>. Persons who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS should contact the NRC PDR Reference staff by telephone at 1-800-397-4209 or 301-415-4737, or send an e-mail to pdr@nrc.gov.

Dated at Rockville, Maryland, this 7th day of January 2010.

Project Manager, Plant Licensing Branch 1-1, Division of Operating Reactor Licensing, Office of Nuclear Reactor Regulation.
