

FEDERAL RESERVE SYSTEM**Federal Open Market Committee;
Domestic Policy Directive of December
15 and 16, 2009**

In accordance with § 271.25 of its rules regarding availability of information (12 CFR part 271), there is set forth below the domestic policy directive issued by the Federal Open Market Committee at its meeting held on December 15 and 16, 2009.¹

The Federal Open Market Committee seeks monetary and financial conditions that will foster price stability and promote sustainable growth in output. To further its long-run objectives, the Committee seeks conditions in reserve markets consistent with federal funds trading in a range from 0 to ¼ percent. The Committee directs the Desk to purchase agency debt agency and agency MBS during the intermeeting period with the aim of providing support to private credit markets and economic activity. The timing and pace of these purchases should depend on conditions in the markets for such securities and on a broader assessment of private credit market conditions. The Desk is expected to execute purchases of about \$175 billion in housing-related agency debt and about \$1.25 trillion of agency MBS by the end of the first quarter of 2010. The Desk is expected to gradually slow the pace of these purchases as they near completion. The Committee anticipates that outright purchases of securities will cause the size of the Federal Reserve's balance sheet to expand significantly in coming months. The System Open Market Account Manager and the Secretary will keep the Committee informed of ongoing developments regarding the System's balance sheet that could affect the attainment over time of the Committee's objectives of maximum employment and price stability.

By order of the Federal Open Market Committee, January 7, 2010.

Brian F. Madigan,

Secretary, Federal Open Market Committee.

¹ Copies of the Minutes of the Federal Open Market Committee at its meeting held on December 15 and 16, 2009, which includes the domestic policy directive issued at the meeting, are available upon request to the Board of Governors of the Federal Reserve System, Washington, D.C. 20551. The minutes are published in the Federal Reserve Bulletin and in the Board's annual report.

FEDERAL RESERVE SYSTEM**Formations of, Acquisitions by, and
Mergers of Bank Holding Companies**

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR Part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. The applications also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act (12 U.S.C. 1843). Unless otherwise noted, nonbanking activities will be conducted throughout the United States. Additional information on all bank holding companies may be obtained from the National Information Center website at www.ffiec.gov/nic/.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than February 12, 2010.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

National Toxicology Program (NTP); Center for the Evaluation of Risks to Human Reproduction (CERHR); Availability of the Final Expert Panel Report on Soy Infant Formula; Request for Public Comment

AGENCY: National Institute of Environmental Health Sciences (NIEHS); National Institutes of Health (NIH); HHS.

ACTION: Announcement of report availability and request for comment.

SUMMARY: CERHR announces the availability of the final expert panel report on soy infant formula on January 15, 2010, from the CERHR Web site (<http://cerhr.niehs.nih.gov>) or in hardcopy from CERHR (see **ADDRESSES** below). The expert panel report is an evaluation of the developmental toxicity of soy infant formula conducted by an independent, 14-member expert panel composed of scientists from the public and private sectors convened by CERHR. CERHR invites the submission of public comments on this report (see **SUPPLEMENTARY INFORMATION** below). The expert panel met in public session (December 16-18, 2009) to review and revise the draft expert panel report and reach conclusions regarding whether exposure to soy infant formula is a hazard to human development. The expert panel also identified data gaps and research needs.

DATES: The final expert panel report on soy infant formula will be available for public comment on January 15, 2010. Written public comments on this report should be received by March 1, 2010.

ADDRESSES: Comments on the expert panel report and any other correspondence should be submitted to Dr. Kristina A. Thayer, Acting CERHR Director, NIEHS, P.O. Box 12233, MD K2-04, Research Triangle Park, NC 27709 (mail), 919-541-5021 (telephone), or thayer@niehs.nih.gov (e-mail). Courier address: NIEHS, 530 Davis Drive, Room K2154, Morrisville, NC 27560.

SUPPLEMENTARY INFORMATION:

Background

Soy infant formula is fed to infants as a supplement or replacement for human milk or cow milk formula. Soy infant formula contains isoflavones such as genistein (CAS RN: 446-72-0), daidzein (CAS RN: 486-66-8), and glycitein (CAS RN: 40957-83-3). Genistein, daidzein, glycitein, and the daidzein metabolite equol are non-steroidal, estrogenic compounds that occur naturally in some plants and are often referred to as "phytoestrogens." In plants, nearly all genistein, daidzein, and glycitein are linked to a sugar molecule and these isoflavone-sugar complexes are called genistin, daidzin, or glycitin.

On December 16-18, 2009, CERHR (74 FR 53508) convened an expert panel to conduct an updated evaluation of the potential developmental toxicity of soy infant formula and its predominant isoflavone constituents. CERHR selected soy infant formula for evaluation because of (1) The availability of numerous developmental toxicity studies in laboratory animals and humans, (2) the availability of information on exposures in infants, and (3) public concern for effects on infant or child development.

Following receipt of public comments on the final expert panel report on soy infant formula, CERHR staff will prepare the NTP monograph. NTP monographs are divided into three major sections: (1) The NTP Brief that provides the NTP's interpretation of the potential for the substance to cause adverse reproductive and/or developmental effects in exposed humans, (2) a roster of expert panel members, and (3) the final expert panel report. The NTP Brief is based on the expert panel report, public comments on that report, public and peer review comments on the draft NTP Brief, and any new, relevant information that becomes available after the expert panel meetings.

Request for Comments

CERHR invites written public comments on the expert panel report on soy infant formula. Written comments should be sent to Dr. Kristina A. Thayer (see **ADDRESSES** above). Persons submitting written comments are asked to include their name and contact information (affiliation, mailing address, telephone and facsimile numbers, e-mail, and sponsoring organization, if any). Any comments received will be posted on the CERHR Web site and the commenter identified by name, affiliation, and sponsoring organization, if applicable. All public comments will be considered by the NTP during preparation of the NTP Brief (see "Background" above).

Background Information on CERHR

The NTP established CERHR in 1998 (63 FR 68782). CERHR is a publicly accessible resource for information about adverse reproductive and/or developmental health effects associated with exposure to environmental and/or occupational exposures. CERHR follows a formal process for the evaluation of selected substances that includes multiple opportunities for public input.

CERHR invites the nomination of substances for review or scientists for its expert registry. Information about CERHR and the nomination process can be obtained from its homepage (<http://cerhr.niehs.nih.gov>) or by contacting Dr. Thayer (see **ADDRESSES** above). CERHR selects substances for evaluation based upon several factors including production volume, potential for human exposure from use and occurrence in the environment, extent of public concern, and extent of data from reproductive and developmental toxicity studies.

Dated: January 8, 2010.
