The estimate of the number of firms that will submit new written requests to be placed on the list, biannual updates and occasional updates is based on the FDA’s experience maintaining the list over the past 4 years. The estimate of the number of hours that it will take a firm to gather the information needed to be placed on the list or update its information is based on FDA’s experience with firms submitting similar requests. FDA believes that the information to be submitted will be readily available to the firms.

To date, over 175 producers have sought to be included on the list. FDA estimates that, each year, approximately 15 new firms will apply to be added to the list. We estimate that a firm will require 1.5 hours to read the guidance, gather the information needed, and to prepare a communication to FDA that contains the information and requests that the firm be placed on the list for a total of 22.5 hours, rounded to 23.

Under the guidance, every 2 years each producer on the list must provide updated information in order to remain on the list. FDA estimates that each year approximately half of the firms on the list, 88 firms (175 x 0.5 = 87.5, rounded to 88), will resubmit the information to remain on the list. We estimate that a firm already on the list will require 1.0 hours to biannually update and resubmit the information to FDA, including time reviewing the information and corresponding with FDA, for a total of 88 hours. In addition, FDA expects that, each year, approximately 25 firms will need to submit an occasional update and each firm will require 0.5 hours to prepare a communication to FDA reporting the change, for a total of 12.5 hours, rounded to 13.

Proposed Project: Advanced Education Nursing Traineeship (AENT) and Nurse Anesthetist Traineeship (NAT) [OMB No. 0915–0305] [Extension]

The Health Resources and Services Administration (HRSA) provides training grants to educational institutions to increase the number of advanced education nurses through the Advanced Education Nursing Traineeship (AENT) Program and the Nurse Anesthetist Traineeship (NAT) Program.

HRSA developed the AENT and NAT tables for the application guidances and the Nurse Traineeship Database for the two nursing traineeship programs. The AENT and NAT tables are used annually by grant applicants that are applying for AENT and NAT funding. The funds appropriated for the AENT and NAT programs are distributed among eligible institutions based on a formula. Award amounts are based on enrollment and graduate data reported on the tables and two funding factors (Statutory Funding Preference and Statutory Special Consideration).

The AENT and NAT tables include information on program participants such as the number of enrollees, projected data on enrollees and graduates for the following academic year, number of trainees supported, number of graduates, number of graduates supported and the types of programs they are enrolling into and/or from which they are graduating. AENT and NAT applicants will have a single access point to submit their grant applications including the tables. Applications are submitted in two phases: Grants.gov (Phase 1) and the HRSA Electronic Handbooks (Phase 2). These tables will be available electronically through the HRSA Electronic Handbooks (Phase 2) for applicants to submit their AENT and/or NAT grant application(s). The tables are also used in the Nurse Traineeship Database which is used by Division of Nursing staff and not the applicants.

Data from the tables will be used in the award determination and validation process. Additionally, the data will be used to ensure programmatic compliance, report to Congress and policymakers on the program accomplishments, and formulate and justify future budgets for these activities submitted to OMB and Congress.

The burden estimate for this project is as follows: AENT increased from 1 hour to 1.5 hours due to the revisions of AENT Tables 1, 2, 3 and 4 to capture comprehensive data to provide for more detailed data analysis of the AENT Program. NAT burden estimate is increased from 1 hour to 1.5 hours in fiscal year 2011 due to the additional data collection.
