**Title:** NESHAP for Mercury Cell Chlor-Alkali Plants.

**ICR Numbers:** EPA ICR Number 2046.05, OMB Control Number 2060-0542.

**ICR Status:** This ICR is scheduled to expire on February 28, 2010. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

**Abstract:** The affected entities are subject to the General Provisions of the National Emission Standards for Hazardous Air Pollutants (NESHAP) for Mercury Cell Chlor-Alkali Plants at 40 CFR part 63, subpart A, and any changes, or additions to the General Provisions specified at 40 CFR part 63, subpart IIII.

Owners or operators of the affected facilities must submit a one-time-only report of any physical or operational changes, initial performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports, at a minimum, are required semiannually.

**Burden Statement:** The annual public reporting and recordkeeping burden for this collection of information is estimated to average 808.5 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

*Respondents/Affected Entities:* Mercury cell chlor-alkali plants.  
*Estimated Number of Respondents:* 9.  
*Frequency of Response:* Occasionally and semiannually.

*Estimated Total Annual Hour Burden:* 14,553.

*Estimated Total Annual Cost:* \$1,491,712, including \$1,417,912 in labor costs, \$0 in capital/startup costs, and \$73,800 in operation and maintenance (O&M) costs.

*Changes in the Estimates:* There is a decrease of 5 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This decrease is due to the adjustment of number of responses associated with the recordkeeping for mass of virgin mercury added to cells. The decrease in Agency burden resulted from an adjustment to the number of initial compliance status and performance test reports requiring review. Since these reports are only one-time burdens, and there are no new sources anticipated in the next three years, the only Agency activity associated with this ICR is to review the semi-annual compliance reports. The burden hours and dollars associated with reviewing the one-time activities were removed from the Agency burden.

Dated: January 15, 2010.
