(202) 366-0113; or, e-mail at kay.mciver@dot.gov.

Technical: Steve Nanney by telephone at (713) 272-2855; or, e-mail at steve.nanney@dot.gov.

SUPPLEMENTARY INFORMATION: PHMSA has received these requests for special permits from pipeline operators who seek relief from compliance with certain pipeline safety regulations. Each request is filed in the Federal Docket Management System (FDMS) and has been assigned a separate docket number in the FDMS. Each docket includes any technical analysis or other supporting documentation provided by the requestor, including a description of any alternative measures the operator proposes to take in lieu of compliance with the current regulations. We invite

interested persons to participate by reviewing these special permit requests at <http://www.Regulations.gov>, and by submitting written comments, data or other views. Please include any comments on potential environmental impacts that may result if these special permits are granted.

Before acting on these special permit requests, PHMSA will evaluate all comments received on or before the comments closing date. Comments will be evaluated after this date if it is possible to do so without incurring additional expense or delay. PHMSA will consider each relevant comment we receive in making our decision to grant or deny a request and what terms and conditions are appropriate.

PHMSA has received the following two special permit requests:

Docket No.	Requester	Regulation(s)	Nature of special permit
PHMSA-2009-0390	Colonial Pipeline Company	49 CFR 195.310(b)	Colonial Pipeline Company requests relief from certain recordkeeping requirements for two segments of Line 01. Colonial Pipeline Company operates 1,049 miles of 40-inch and 36-inch diameter steel pipeline that runs from Houston, Texas to Greensboro, North Carolina. The segments of request include approximately 66 miles of 40-inch pipeline in LA, and 10 miles of 36-inch pipeline in GA, for which Colonial can no longer locate certain pressure recording charts and calibration data from the original construction hydrostatic testing of the pipeline. These original construction hydrostatic tests were conducted more than thirty years ago. The application is for a special permit to waive the requirement to have retained the pressure recording charts and certain other pressure test data.
PHMSA-2009-0407	Union Oil of California (Chevron).	49 CFR 195.452(h)(3) and 195.452(h)(4)(iii).	Union Oil of California requests a waiver to the 180-day repair requirement for a riser which is part of the Anna platform "A" pipeline. The Anna platform "A" pipeline terminates at the Bruce platform riser located in Kenai Borough, Alaska on the Cook Inlet, a navigable waterway. The Bruce platform riser, for which the special permit is sought, is a 12-inch OD riser, constructed of .500 inch wall thickness, ASTM A53 grade B material with coating of unknown origin. The riser was constructed in 1967. Union Oil of California conducted an in-line inspection in 2008. The results demonstrated a 64% wall loss. Union Oil of California requests a waiver from repairs due to the inaccessibility of the repair location, the MOP, and the remaining 36% original wall thickness. Union Oil of California proposes alternative measures to mitigate the wall thickness loss. These measures include re-inspection of the 12-inch pipeline riser location in 2010.

Authority: 49 U.S.C. 60118(c)(1) and 49 CFR 1.53.

Issued in Washington, DC, on January 19, 2010.

Jeffrey D. Wiese,

Associate Administrator for Pipeline Safety.
