**SUPPLEMENTARY INFORMATION:** On July 13, 2009, EPA published a notice that the state of Maine had petitioned the Regional Administrator, Environmental Protection Agency, to determine that adequate facilities for the safe and sanitary removal and treatment of sewage from all vessels are reasonably available for the waters of Camden, Rockland, Rockport and portions of

Owls Head. Six comments were received on this petition. The response to comments can be obtained utilizing the above contact information.

The petition was filed pursuant to Section 312(f)(3) of Public Law 92-500, as amended by Public Laws 95-217 and 100-4, for the purpose of declaring these waters a No Discharge Area (NDA).

Section 312(f)(3) states: After the effective date of the initial standards and regulations promulgated under this section, if any State determines that the protection and enhancement of the quality of some or all of the waters within such State require greater environmental protection, such State may completely prohibit the discharge from all vessels of any sewage, whether treated or not, into such waters, except that no such prohibition shall apply until the Administrator determines that adequate facilities for the safe and sanitary removal and treatment of sewage from all vessels are reasonably available for such water to which such prohibition would apply.

This Notice of Determination is for the waters of Camden, Rockport, Rockland and portions of Owls Head. The NDA boundaries are as follows:

The area includes the municipal waters of Camden, Rockport, Rockland, and portions of Owls Head.

The information submitted to EPA by the state of Maine certifies that there are six pumpout facilities located within this area. A list of the facilities, with locations, phone numbers, and hours of

operation is appended at the end of this determination.

Based on the examination of the petition and its supporting documentation, and information from site visits conducted by EPA New England staff, EPA has determined that adequate facilities for the safe and

sanitary removal and treatment of sewage from all vessels are reasonably available for the area covered under this determination.
