

negligible effects on the species covered in the HCP. Therefore, we are making a preliminary determination that the ITP is a "low-effect" project and qualifies for categorical exclusion under the National Environmental Policy Act (NEPA; 42 U.S.C. 4321 *et seq.*), as provided by the Department of the Interior Manual (516 DM 2 Appendix 1 and 516 DM 6 Appendix 1). We may revise this preliminary determination based on our review of public comments we receive in response to this notice. A low-effect HCP is one involving (1) Minor or negligible effects on federally listed or candidate species and their habitats, and (2) minor or negligible effects on other environmental values or resources.

We will evaluate the HCP and comments we receive to determine whether the ITP application meets the requirements of section 10(a) of the Act (16 U.S.C. 1531 *et seq.*). If we determine that the application meets those requirements, we will issue the ITP for incidental take of the sand skink. We will also evaluate whether issuance of the section 10(a)(1)(B) ITP complies with section 7 of the Act by conducting an intra-Service section 7 consultation. We will use the results of this consultation, in combination with the above findings, in our final analysis to determine whether or not to issue the ITP.

Authority

We provide this notice under Section 10 of the Act and NEPA regulations in the Code of Federal Regulations (CFR) at 40 CFR 1506.6.

Dated: January 12, 2010.
