BILLING CODE 5001-06-P

DEPARTMENT OF DEFENSE**Department of the Army; Corps of Engineers**

Availability of the Final Environmental Impact Statement (FEIS) for the Relocation of New River Inlet Ebb Tide Channel Between North Topsail Beach and Onslow Beach, and the Placement of the Dredged Material Along the Ocean Shoreline of North Topsail Beach in Onslow County, NC

AGENCY: Department of the Army, U.S. Army Corps of Engineers, DoD.

ACTION: Notice of availability.

SUMMARY: In accordance with the requirements of the National Environmental Policy Act (NEPA), the U.S. Army Corps of Engineers (COE) Wilmington District, Wilmington

Regulatory Field Office announces the availability of a Regulatory Program Final EIS for the North Topsail Beach Shoreline Protection Project. The applicant, The Town of North Topsail Beach, is requesting Department of the Army authorization, pursuant to Section 404 of the Clean Water Act and Section 10 of the Rivers and Harbor Act, to protect residential homes and town infrastructures by nourishing approximately 11.1 miles of beachfront via repositioning the New River Inlet channel, implementing an inlet management plan to control the positioning of the new inlet channel, and utilizing an offshore borrow area. The new channel will be centrally located and the proposal will be to maintain that position, which essentially will be located perpendicular to the adjacent shorelines of North Topsail Beach and Onslow Beach. The proposed sources of the material for the beach nourishment will come from the repositioning of the inlet and an identified offshore borrow area. The projected amount of material needed to initially nourish the oceanfront shoreline is approximately 3.11 million cubic yards. The placement of beach fill along the Town's shoreline would result in the initial widening of the beach by 50 to 100 feet. The widened beach would be maintained through a program of periodic beach nourishment events with the material extracted from the maintenance of the newly relocated channel. All work will be accomplished using a hydraulic cutterhead dredge. The proposed project construction will be conducted in a five phase approach to correspond with the Town's anticipated annual generation of funds.

The ocean shoreline of the Town of North Topsail Beach encompasses approximately 11.1 miles along the northern end of Topsail Island. Of the 11.1 miles, approximately 7.25-miles of the shoreline in the project area, with the exception of two small areas, is located within the Coastal Barrier Resource System (CBRS), which prohibits the expenditure of Federal funds that would encourage development.

The channel through New River Inlet has been maintained by the COE for commercial and recreational boating interest for over 55 years. The COE is authorized to maintain the channel in the inlet to a depth of 6 feet mean low water (mlw) over a width of 90 feet, following the channel thalweg.

DATES: The Public commenting period on the FEIS will end on March 1, 2010. Written comments must be received at

the address listed below no later than 5 p.m.

ADDRESSES: Copies of comments and questions regarding the FEIS may be addressed to: U.S. Army Corps of Engineers, Wilmington District, Regulatory Division, ATTN: File Number 2005-0344, 69 Darlington Avenue, Wilmington, NC 28403.

FOR FURTHER INFORMATION CONTACT:

Questions about the proposed action and the FEIS can be directed to Mr. Mickey Sugg, Wilmington Regulatory Field Office, telephone: (910) 251-4811, facsimile (910) 251-4025, or e-mail at mickey.t.sugg@saw02.usace.army.mil.

SUPPLEMENTARY INFORMATION: The Town of North Topsail Beach, located along the north-northeast 11.1 miles of Topsail Island in North Carolina, is proposing to nourish the oceanfront shoreline and reposition New River Inlet channel as a means to address a severe erosion problem in order to preserve the Town's tax base, protect its infrastructure, and maintain its tourist oriented economy. The entire stretch of the Town's shoreline has experienced a considerable amount of erosion over the last 20 years due primarily to the impact of numerous tropical storms and hurricanes during the mid to late 1990's and due to impacts of the uncontrolled movement of the main ebb channel in New River Inlet. The Town has stated that the shoreline erosion and residual effects of the storms have left North Topsail Beach in an extremely vulnerable position with regard to its ocean front development and infrastructure. They have estimated that over \$250 million in property tax value as well as roads, water and sewer lines, and other utilities are at risk. The stated overall goals and objectives of the project are the following: (1) Long-term stabilization of the oceanfront shoreline located immediately south of New River Inlet, (2) Provide short-term protection to the 31 imminently threatened residential structures over the next zero to five years, (3) Provide long-term protection to Town infrastructure and approximately 1,200 homes, (4) Reduce or mitigate for property damage associated with shoreline erosion along 11.1 miles of oceanfront shoreline of North Topsail Beach, (5) Improve recreational opportunities along the Town's oceanfront shoreline, (6) Ensure material utilized for shore protection is beach compatible, (7) Maintain the Town's tax base by protecting existing development and infrastructure on the oceanfront shoreline of North Topsail Beach, and (8) Balance the needs of the human environment by minimizing and
