

FERC information collection	Annual burden (hrs.)	Average cost (\$) per hour	Total annual cost (\$)
	(1)	(2)	(1) × (2)
FERC Form 60 ³	2,850	\$120.00/hour	\$342,000.00
FERC-61 ²	11	61.68125/hour	678.49
FERC-555A ⁴	108,000	(⁴)	⁴ 1,912,341.25
Totals			2,255,019.74

The reporting burden includes the total time, effort, or financial resources expended to generate, maintain, retain, disclose, or provide the information including: (1) Reviewing instructions; (2) developing, acquiring, installing, and utilizing technology and systems for the purposes of collecting, validating, verifying, processing, maintaining, disclosing and providing information; (3) adjusting the existing ways to comply with any previously applicable instructions and requirements; (4) training personnel to respond to a collection of information; (5) searching data sources; (6) completing and reviewing the collection of information; and (7) transmitting, or otherwise disclosing the information.

The estimate of cost for respondents is based upon salaries for professional and clerical support, as well as direct and indirect overhead costs. Direct costs include all costs directly attributable to providing this information, such as administrative costs and the cost for information technology. Indirect or overhead costs are costs incurred by an organization in support of its mission. These costs apply to activities which benefit the whole organization rather than any one particular function or activity.

Comments are invited on: (1) Whether the proposed collections of information are necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimates of the burden of the proposed collections of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information to be collected; and (4)

⁴ Based on an estimated 120 cubic feet of paper records per respondent, the total estimated annual cost to all respondents is \$1,912,341.25 [\$1,836,000 (for staffing), plus \$76,341.25 (for storage)]. However, the storage of paper (and related record retention and access) is more expensive than electronic storage, so savings are accomplished when documents are stored electronically (e.g., by using on-line electronic storage or removable storage media like CD-ROM or thumb drives). It would appear that these records are likely stored electronically, so the estimated cost (\$1,912,341.25) of storage for paper only is the worst case estimate.

ways to minimize the burden of the collections of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Kimberly D. Bose,
Secretary.

[Project No. 13651-000]

Lock + TM Hydro Friends Fund XXXIII, LLC; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

January 22, 2010.

On January 8, 2010, Lock + TM Hydro Friends Fund XXXIII, LLC (Lock + Hydro) filed an application, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of the Green Lantern Project No. 13651, to be located on the Mississippi River, in Pike County, Illinois, and Ralls County, Missouri. The project would be located at the existing Mississippi River Lock and Dam No. 22 owned and operated by the U.S. Corps of Engineers that includes a reservoir, a lock and dam equipped with roller and tainter gates, and an earth dike.

The proposed project would consist of: (1) Two new underwater frame modules located adjacent to the earth dike each containing nine turbine generating units with a total capacity of about 9.45 megawatts; (2) a new 220-foot, 450-foot-long intake conduit; (3) a new 220-foot-wide, 50-foot-long tailrace; and (4) a new 5-mile-long, 69 kilovolt transmission line. The project would produce an estimated average annual generation of about 62,130 megawatts-hours.

Lock + Hydro Contact: Wayne F. Krouse, Chairman and CEO, Hydro

Green Energy, LLC., 5090 Richmond Avenue, Suite 290, Houston, TX 77056, (877) 556-6566.

FERC Contact: Tom Dean, (202) 502-6041.

Deadline for filing comments, motions to intervene, competing applications (without notices of intent), or notices of intent to file competing applications: 60 days from the issuance of this notice. Comments, motions to intervene, notices of intent, and competing applications may be filed electronically via the Internet. See 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site under the "eFiling" link. If unable to be filed electronically, documents may be paper-filed. To paper-file, an original and eight copies should be mailed to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426. For more information on how to submit these types of filings please go to the Commission's Web site located at <http://www.ferc.gov/filing-comments.asp>. More information about this project can be viewed or printed on the "eLibrary" link of Commission's Web site at <http://www.ferc.gov/docs-filing/elibrary.asp>. Enter the docket number (P-13651) in the docket number field to access the document. For assistance, call toll-free 1-866-208-3372.

Kimberly D. Bose,
Secretary.
