Proposed Project: ARRA Section 3012 Health Information Technology Extension Program: Regional Centers Cooperative Agreement Program OMB # 0990-0340—Extension—Office of the National Coordinator for Health Information Technology.

Abstract: The first set of regional extension center awards will be made in February 2010. At this point each regional extension center (REC) will be provided with a customer relationship management (CRM) software tool, which they will use to help manage the work associated with the cooperative agreement. This tool will also assist the program to generate quarterly reports with will be submitted to project officers for review. In addition to tracking the key milestones identified in the FOA, the tool will also assist programs to provide information that is required for their ARRA reporting. The REC program is in the process of selecting a CRM vendor. Once this is completed it will submit the specific reports for clearance.

Proposed Project: Patient Perceptions of the Delivery of Health Care Through the Use of an Electronic Health Record (New)—OMB No. 0990-NEW—Office of the National Coordinator for Health Information Technology.

Abstract: Recognizing the potential of health information technology (IT), Congress incorporated the Health Information Technology for Economic and Clinical Health (HITECH) Act as part of the American Recovery and Reinvestment Act of 2009, and allocated \$19.2 billion to meet the goal of meaningful use of certified EHRs for

each person in the United States by 2014. The HITECH Act builds on existing federal efforts to encourage health IT adoption and use, and contains provisions that are expected to promote the widespread adoption of health IT among health care providers. Health IT experts agree that HITECH stimulus funds are likely to improve how physicians practice medicine for Medicare and Medicaid beneficiaries and, ultimately, for advancing patient-centered medical care for all Americans. However, there is an evidence gap about patients' preferences and perceptions of delivery of health care services by providers who have adopted EHR systems in their practices.

The goal of the Patient Perceptions of the Delivery of Health Care through the Use of an Electronic Health Record (Patient Perceptions of EHR) Study is to help policymakers understand how primary care practices' use of electronic health records (EHRs) affects consumers' satisfaction with (1) their medical care, (2) communication with their doctor, and (3) coordination of care. The research questions for the proposed Patient Perceptions of EHR Study are motivated by a concern that patients may have negative experiences as practices begin to use EHRs.
