Title: NESHAP for Printing and Publishing Industry (Renewal).

ICR Numbers: EPA ICR Number 1739.06, OMB Control Number 2060-0335.

ICR Status: This ICR is scheduled to expire on March 31, 2010. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The National Emission Standards of Hazardous Air Pollutants (NESHAP) for Printing and Publishing Industry were proposed on March 14, 1995 (60 FR 13664), promulgated on May 30, 1996 (61 FR 27131), and amended on May 24, 2006 (71 FR 29792). These standards apply to the following facilities in 40 CFR subpart KK: Publication rotogravure, product and packaging rotogravure, and wide-web flexographic printing presses at major sources. The effective date was May 30, 1999, for sources existing on May 30, 1996. For new sources or reconstructed sources after May 30, 1996, the effective date of startup is May 30, 1996, whichever is later.

Owners and operators of a new and existing area source are subject to the General Provision (40 CFR part 63, subpart A). In general, all NESHAP standards require initial notifications, performance tests plans, and periodic reports by the owners/operators of the affected facilities. For the facilities installing continuous monitoring systems (CMS), there are performance test and maintenance reports.

They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance and are required of all

affected facilities subject to NESHAP. Semiannual summary reports are also required.

Any owner or operator subject to the provisions of this subpart must maintain a file of these measurements, and retain the file for at least five years following the collection of such measurements, maintenance reports, and records.

All reports are sent to the delegated state or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA regional office. This information is being collected to assure compliance with 40 CFR part 63, subpart KK, as authorized in sections 112 and 114(a) of the Clean Air Act. The required information consists of emissions data and other information that have been determined to be private.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Number for EPA regulations listed in 40 CFR part 9 and 48 CFR chapter 15, are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information estimated to average 95 hour per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose, and provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information. All existing ways will have to adjust to comply with any previously applicable instructions and requirements that have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Printing and publishing industry.

Estimated Number of Respondents: 352.

Frequency of Response: Initially, annually, and semiannually.

Estimated Total Annual Hour Burden: 58,215.

Estimated Total Annual Cost: \$5,888,997, which includes \$5,474,997 in labor costs, \$0 in capital/startup costs, and \$414,000 in operation and maintenance (O&M) costs.

Changes in the Estimates: There is a change in this ICR as compared to the previous one. Based on our discussions with the printing and publishing industry representatives, the printing industry in particular, will be experiencing essentially a flat production in the coming years with no new facilities anticipated. This ICR also reflects the most recent hourly labor rates which, takes into account the managerial, technical and clerical burdens as compared to the previous ICR. Corrections include a minor mathematical error and recalculation of the number of responses.

There is a small increase in the capital/startup and operations and maintenance (O&M) costs from the previous ICR, which is due to rounding-up the number of affective respondents.

Dated: February 1, 2010.
