II. Background

The draft National Disaster Recovery Framework (NDRF) addresses the short, intermediate, and long-term challenges of managing disaster recovery. Like the National Response Framework (NRF), the NDRF is intended to address all hazards events, whether natural or man-made and provide constructs that are scalable, adaptable, and responsive to the changing needs of different disasters. In recognizing the continuum between preparedness, response, recovery, and mitigation, the draft NDRF is intended to overlap and continue beyond the scope of the NRF.

This opportunity for public comment on the draft NDRF is a continuation of an extensive engagement effort undertaken by the interagency Long Term Disaster Recovery Working Group established by the President in October 2009, and co-chaired by the Secretaries of the Departments of Homeland Security and Housing and Urban Development. During the fall of 2009, DHS/FEMA and HUD sponsored outreach sessions in each of FEMA's ten regions and stakeholder forums in five cities across the nation to provide stakeholders from a wide array of organizations and backgrounds the opportunity to provide up-front input to the Working Group on ways to strengthen disaster recovery. DHS/FEMA and HUD also organized discussion roundtables with

professional associations and academic experts. The Long-term Disaster Recovery Working Group also created a Web portal, <http://www.disasterrecoveryworkinggroup.gov>, which enabled a large and diverse group of stakeholders to provide input. Over six hundred stakeholders representing local, state, tribal and federal government, as well as public and private sector organizations contributed more than six thousand responses from across the nation. FEMA, HUD, and the Federal interagency partners on the Working Group have reviewed this stakeholder feedback and used it to inform development of the draft NDRF. We now seek direct feedback on the draft NDRF itself through this public comment period. The Long Term Disaster Recovery Working Group is also preparing a Report to the President for delivery in early April that will document the Working Group's overall findings and recommendations.

The draft NDRF provides recovery concepts and principles important to all disaster recovery stakeholders. It provides guidance to stakeholders for engaging in pre-disaster recovery planning and other recovery preparedness and resiliency building efforts; clarifies roles for local, state, tribal and Federal governments, private-non-profit and private sector organizations; provides guidance for facilitating post-disaster recovery planning to expedite long-term disaster recovery; and provides assistance to stakeholders in identifying recovery needs beyond replacement or return to pre-disaster condition. The document also provides guidance that impacted communities may use to develop recovery priorities, and measure recovery progress and outcomes against their agreed-upon objectives. It also provides guidance for both government and non-governmental organizations providing recovery assistance to track progress, ensure accountability, and make adjustments to ongoing assistance.

The draft NDRF lays out a systematic approach to disaster recovery, applicable to all levels of government and sectors of communities with recovery responsibilities. The draft NDRF is a guidance document. It does not have the force or effect of law.

FEMA seeks comment on the draft NDRF, which is available online at <http://www.regulations.gov> in docket ID FEMA-2010-0004. Although FEMA seeks comments on all aspects of the document, we are particularly interested in receiving input on whether the document's outline of the relationship between the existing Emergency Support Functions and the proposed
