discussed in the statement. Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3 in addressing these points.

In the final EIS, the Forest Service is required to respond to substantive comments and responses received during the comment period that pertain to the environmental consequences discussed in the draft EIS and applicable laws, regulations, and policies considered in making a decision regarding the proposal. The Responsible Official will document the decision and rationale for the decision in a Record of Decision. The final EIS is scheduled for completion in September, 2010. The decision will be subject to review under Forest Service Appeal Regulations.

Robert G. MacWhorter, Forest Supervisor, Dixie National Forest.

BILLING CODE 3410–11–M

DEPARTMENT OF COMMERCE
Forest Service

AGENCY: Forest Service, USDA.

ACTION: Meeting notice for the Ouachita-Ozark Resource Advisory Committee.

Section 205 of the Secure Rural Schools and Community Self Determination Act of 2000, as part of Public Law 110–343.

SUMMARY: This notice is published in accordance with section 10(a)(2) of the Federal Advisory Committee Act. Meeting notice is hereby given for the Ouachita-Ozark Resource Advisory Committee pursuant to Section 205 of the Secure Rural Schools and Community Self Determination Act of 2000, as part of Public Law 110–343.

DATES: The meeting will be held on March 2, 2010, beginning at 5:45 p.m. and ending at approximately 9 p.m.

ADDRESSES: The meeting will be held at the Janet Huckabee Arkansas River Valley Nature Center, 8300 Wells Lake Road, Barling, Arkansas.

FOR FURTHER INFORMATION CONTACT: Caroline Mitchell, Committee Coordinator, USDA, Ouachita National Forest, P.O. Box 1270, Hot Springs, AR 71902. (501–321–5318)

SUPPLEMENTARY INFORMATION: The meeting is open to the public. Committee discussion is limited to Forest Service staff, Committee members, and elected officials. However, persons who wish to bring matters to the attention of the Committee may file written statements with the Committee staff before or after the meeting. Individuals wishing to speak or propose agenda items must send their names and proposals to Bill Pell, DFO, P.O. Box 1270, Hot Springs, AR 71902.

Bill Pell, Designated Federal Official.

BILLING CODE 3410–52–M

DEPARTMENT OF COMMERCE
National Telecommunications and Information Administration

AGENCY: National Telecommunications and Information Administration, U.S. Department of Commerce.

ACTION: Notice announcing OMB approval of an information collection and publication of an OMB Control Number.

SUMMARY: The National Telecommunications and Information Administration (NTIA) announces that the Office of Management and Budget (OMB) has approved the collection of information contained in the Notice of Funds Availability (NOFA) for the Broadband Opportunities Program (BTOP) published on January 22, 2010.

FOR FURTHER CONTACT INFORMATION: For general inquiries regarding BTOP, contact Anthony Wilhelm, Director, BTOP, Office of Telecommunications and Information Applications, National Telecommunications and Information Administration, U.S. Department of Commerce (DOC), 1401 Constitution Avenue, NW., HCHB, Room 4887, Washington, DC 20230; Help Desk e-mail: BroadbandUSA@usda.gov; Help Desk telephone: 1–877–509–8364.

Additional information regarding BTOP may be obtained at http://www.ntia.doc.gov/broadbandgrants/.

SUPPLEMENTARY INFORMATION: On January 22, 2010, NTIA published a Notice of Funds Availability (NOFA) (75 FR 3792) announcing general policy and application procedures for the Broadband Technology Opportunities Program (BTOP) established pursuant to the American Recovery and Reinvestment Act of 2009 (ARRA). In this second round of funding, NTIA will award grants in three categories of eligible projects: Comprehensive Community Infrastructure (CCI), Public Computer Centers (PCC), and Sustainable Broadband Adoption (SBA).

The application requirements for the BTOP contained in the NOFA are an information collection subject to the requirements of the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501 et seq.). However, NTIA indicated in the NOFA that the information collection associated with BTOP had not yet been approved by OMB and that it would publish a subsequent notice in the Federal Register when that event occurred.

By this notice, NTIA announces that OMB approved the amendment to the information collection approved under OMB Control Number 0660–0031. The expiration date for this information collection is July 31, 2010. This collection of information was approved by OMB in accordance with the emergency processing provisions under 5 CFR 1320.13 to allow NTIA to fulfill its ARRA requirements.

Notwithstanding any other provision of law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with a collection of information subject to the Paperwork Reduction Act unless that collection displays a currently valid OMB Control Number.

Kathy D. Smith, Chief Counsel, National Telecommunications and Information Administration.

BILLING CODE 3510–60–P

DEPARTMENT OF COMMERCE
International Trade Administration

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

SUMMARY: On August 7, 2009, the Department of Commerce (the Department) published the preliminary...
results of the administrative review of the antidumping duty order on stainless steel sheet and strip (S4) in coils from Mexico. See Stainless Steel Sheet and Strip in Coils From Mexico; Preliminary Results of Antidumping Duty Administrative Review and Intent Not To Revoke Order in Part, 74 FR 39622 (August 7, 2009) (Preliminary Results). This review covers sales of subject merchandise made by ThyssenKrupp Mexinox S.A. de C.V. (Mexinox) for the period July 1, 2007, to June 30, 2008. Based on our analysis of the comments received, we have made changes to the margin calculation; therefore, the final results differ from the preliminary results. The final weighted-average dumping margin for the reviewed firm is listed below in the section entitled “Final Results of Review.”

DATES: Effective Date: February 10, 2010.

FOR FURTHER INFORMATION CONTACT: Patrick Edwards, Brian Davis, or Angelica Mendoza, AD/CVD Operations, Office 7, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 482–8029, (202) 482–7924, and (202) 482–3019, respectively.

SUPPLEMENTARY INFORMATION:

Background

Period of Review

The period of review (POR) is July 1, 2007, to June 30, 2008.

Scope of the Order

For purposes of the order, the products covered are certain stainless steel sheet and strip in coils. Stainless steel is alloy steel containing, by weight, 1.2 percent or less of carbon and 10.5 percent or more of chromium, with or without other elements. The subject sheet and strip is a flat-rolled product of stainless steel, not further worked than cold-rolled (cold-reduced), in coils, of a width of not more than 23 mm and a thickness of 0.266 mm or less, containing, by weight, 12.5 to 14.5 percent chromium, and certified at the time of entry to be used in the manufacture of razor blades. See Chapter 72 of the HTSUS, “Additional U.S. Note” (d).

In response to comments by interested parties, the Department has determined that certain specialty stainless steel products are also excluded from the scope of the order. These excluded products are described below.

- Flapper valve steel is defined as stainless steel strip in coils containing, by weight, between 0.37 and 0.43 percent carbon, between 1.15 and 1.35 percent molybdenum, and between 0.20 and 0.50 percent manganese. This steel also contains, by weight, phosphorus of 0.025 percent or less, silicon of between 0.20 and 0.50 percent, and sulfur of 0.02 percent or less. The product is manufactured by means of vacuum arc remelting, with inclusion controls for sulphide of no more than 0.04 percent and for oxide of no more than 0.05 percent. Flapper valve steel has a tensile strength of between 210 and 300 ksi, yield strength of between 170 and 270 ksi, plus or minus 8 ksi, and a hardness (HV) of between 460 and 590. Flapper valve steel is most commonly used to produce specialty flapper valves for compressors.
- Also excluded is a product referred to as suspension foil, a specialty steel product used in the manufacture of suspension assemblies for computer disk drives. Suspension foil is described as 302/304 grade or 202 grade stainless steel of a thickness between 14 and 127 microns, with a thickness tolerance of plus-or-minus 0.01 mils, and surface glossiness of 200 to 700 percent Gs. Suspension foil must be supplied in coil widths of not more than 407 mm, and with a mass of 225 kg or less. Roll marks
may only be visible on one side, with no scratches of measurable depth. The material must exhibit residual stresses of 2 mm maximum deflection, and flatness of 1.6 mm over 685 mm length.

Certain stainless steel foil for automotive catalytic converters is also excluded from the scope of the order. This stainless steel strip in coils is a specialty foil with a thickness of between 20 and 110 microns used to produce a metallic substrate with a honeycomb structure for use in automotive catalytic converters. The steel contains, by weight, carbon of no more than 0.030 percent, silicon of no more than 1.0 percent, manganese of no more than 1.0 percent, chromium of between 19 and 22 percent, aluminum of no less than 5.0 percent, lanthanum of between 0.002 and 0.05 percent, and total rare earth elements of more than 0.06 percent, with the balance iron.

Permanent magnet iron-chromium-cobalt alloy stainless strip is also excluded from the scope of the order. This ductile stainless steel strip contains, by weight, 26 to 30 percent chromium, and 7 to 10 percent cobalt, with the remainder of iron, in widths 228.6 mm or less, and a thickness between 0.127 and 1.270 mm. It exhibits magnetic remanence between 9,000 and 12,000 gauss, and a coercivity of between 0.127 and 1.270 mm. It exhibits magnetic remanence between 9,000 and 12,000 gauss, and a coercivity of between 0.127 and 1.270 mm. It exhibits magnetic remanence between 9,000 and 12,000 gauss, and a coercivity of between 0.127 and 1.270 mm. It exhibits magnetic remanence between 9,000 and 12,000 gauss, and a coercivity of between 0.127 and 1.270 mm.

Permanent magnet iron-chromium-cobalt alloy stainless strip is also excluded from the scope of the order. This ductile stainless steel strip contains, by weight, 26 to 30 percent chromium, and 7 to 10 percent cobalt, with the remainder of iron, in widths 228.6 mm or less, and a thickness between 0.127 and 1.270 mm. It exhibits magnetic remanence between 9,000 and 12,000 gauss, and a coercivity of between 0.127 and 1.270 mm. It exhibits magnetic remanence between 9,000 and 12,000 gauss, and a coercivity of between 0.127 and 1.270 mm. It exhibits magnetic remanence between 9,000 and 12,000 gauss, and a coercivity of between 0.127 and 1.270 mm.

Certain martensitic precipitation-hardenable stainless steel is also excluded from the scope of the order. This high-strength, ductile stainless steel product is designated under the Unified Numbering System (UNS) as S45500-grade steel, and contains, by weight, 11 to 13 percent chromium, and 7 to 10 percent nickel. Carbon, manganese, silicon and molybdenum each comprise, by weight, 0.05 percent or less, with phosphorus and sulfur each comprising, by weight, 0.03 percent or less. This steel has copper, niobium, and titanium added to achieve aging, and will exhibit yield strengths as high as 1700 Mpa and ultimate tensile strengths as high as 1750 Mpa after aging, with elongation percentages of 3 percent or less in 50 mm. It is generally provided in thicknesses between 0.635 and 0.787 mm, and in widths of 25.4 mm. This product is most commonly used in the manufacture of television tubes and is currently available under proprietary trade names such as “Durphynox 17.”

Finally, three specialty stainless steels typically used in certain industrial blades and surgical and medical instruments are also excluded from the scope of the order. These include stainless steel strip in coils used in the production of textile cutting tools (e.g., carpet knives). This steel is similar to ASTM grade 440F, but containing, by weight, 0.5 to 0.7 percent of molybdenum. The steel also contains, by weight, carbon of between 1.0 and 1.1 percent, sulfur of 0.020 percent or less, and includes between 0.20 and 0.30 percent copper and between 0.20 and 0.50 percent cobalt. This steel is sold under proprietary names such as “GIN4 Mo.”

Changes Since the Preliminary Results

For purposes of the preliminary results, we accepted Mexinox’s reporting of the handling expenses incurred by Mexinox Trading (Mexinox’s home market affiliate) and imputed credit expenses based on reported payment dates. However, in order to be consistent with past administrative reviews of this case, we placed respondent on notice that we intended to request additional information after the issuance of the preliminary results regarding (1) the reported handling expenses, and (2) the actual date of payment for these sales, and address these issues in our final results. See Preliminary Results at 39630; see also Memorandum to the File, “Analysis of Data Submitted by ThyssenKrupp Mexinox S.A. de C.V. for the Preliminary Results of the Antidumping Duty Administrative Review of Stainless Steel Sheet and Strip in Coils from Mexico (A–201–822),” from Patrick Edwards and Brian Davis, Case Analysts, through Angelica.

Analysis of Comments Received

All issues raised in the case and rebuttal briefs by interested parties in this administrative review are addressed in the Issues and Decision Memorandum, “Issues and Decision Memorandum for the Final Results of the Antidumping Duty Administrative Review of Stainless Steel Sheet and Strip in Coils from Mexico” (Issues and Decision Memorandum), from John M. Andersen, Acting Deputy Assistant Secretary for Import Administration, to Ronald K. Lorentzen, Deputy Assistant Secretary for Import Administration, dated December 2, 2009, which is hereby adopted by this notice. A list of all issues, which parties have raised and to which we have responded, in the Issues and Decision Memorandum is attached to this notice as an appendix. Parties can find a complete discussion of all issues raised in this review and the corresponding recommendations in this public memorandum, which is on file in the Central Records Unit in room 1117 of the main Commerce building. In addition, a complete version of the Issues and Decision Memorandum can be accessed directly via the Internet at www.ia.ita.doc.gov/fm/index.html. The paper copy and electronic version of the Issues and Decision Memorandum are identical in content.

1“Arnokrome III” is a trademark of the Arnold Engineering Company.
2“Gilphy 36” is a trademark of Imphy, S.A.
3“Durphynox 17” is a trademark of Imphy, S.A.
4This list of uses is illustrative and provided for descriptive purposes only.
5“GIN4 Mo,” “GIN5” and “GIN6” are the proprietary grades of Hitachi Metals America, Ltd.
Mendoza, Program Manager, dated July 31, 2009, at page 18. Accordingly, on August 24, 2009, we requested Mexinox report, with regard to handling expenses, (1) a worksheet showing the total warehousing and distribution expenses (separated by warehouse) for all sales handled by Mexinox Trading during the POR, and (2) the total value of the sales on which these expenses were incurred. See Mexinox’s September 8, 2009, response to the Department’s August 24, 2009, supplemental questionnaire (SSSSQR) at pages 2–4 and attachment B–36. Therefore, we have recalculated the handling expenses incurred by Mexinox Trading and applied the revised ratio to those home market sales for which Mexinox reported a handling expense. See Memorandum to the File, “Analysis of Data Submitted by ThyssenKrupp Mexinox S.A. de C.V. for the Final Results of the Antidumping Duty Administrative Review of Stainless Steel Sheet and Strip in Coils from Mexico (A–201–822)” (Final Analysis Memorandum), from Brian Davis and Patrick Edwards, Case Analysts, through Angelica Mendoza, Program Manager, dated February 3, 2010, at pages 10 through 12.

Also on August 24, 2009, we requested that Mexinox (1) clarify whether or not it was able to calculate per-unit credit expenses based on the actual number of days between the date of shipment to the customer and the date of payment and, if so, (2) report the transaction-specific payment dates for each customer as well as imputed credit expenses based on those transaction specific dates. See Mexinox’s September 8, 2009, response to the Department’s August 24, 2009, supplemental questionnaire (SSSSQR) at pages 4–8 and accompanying database revisions. Therefore, we have recalculated the handling expenses incurred by Mexinox Trading and applied the revised ratio to those home market sales for which Mexinox reported a handling expense. See Memorandum to the File, “Analysis of Data Submitted by ThyssenKrupp Mexinox S.A. de C.V. for the Final Results of the Antidumping Duty Administrative Review of Stainless Steel Sheet and Strip in Coils from Mexico (A–201–822)” (Final Analysis Memorandum), from Brian Davis and Patrick Edwards, Case Analysts, through Angelica Mendoza, Program Manager, dated February 3, 2010, at pages 10 through 12.

We calculated imputed credit expenses based on the short-term borrowing rate associated with the currency of each home market sale transaction and using transaction-specific payment dates (as reported by Mexinox in its SSSQR at pages 4–7 and corresponding home market sales database) rather than customer-specific weighted average ones (as originally reported by Mexinox in its response to section B of the Department’s antidumping duty questionnaire at page B–21 and attachment B–14). See Final Analysis Memorandum at 9 through 10; see also Issues and Decision Memorandum at Comment 5 for a further discussion of imputed credit expenses.

Our methodology for calculating handling charges and imputed credit expenses is consistent with past administrative reviews of this case. See, e.g., Stainless Steel Sheet and Strip in Coils From Mexico; Preliminary Results of Antidumping Duty Administrative Review, 73 FR 45708 (August 6, 2008) at 45715 (unchanged in Stainless Steel Sheet and Strip in Coils from Mexico; Final Results of Antidumping Duty Administrative Review, 74 FR 6365 (February 9, 2009)), and accompanying Issues and Decision Memorandum at Comment 1 (for imputed credit expenses); see also Stainless Steel Sheet and Strip in Coils from Mexico; Preliminary Results of Antidumping Duty Administrative Review, 72 FR 43600 (August 6, 2007) at 43605 (unchanged in Stainless Steel Sheet and Strip in Coils from Mexico; Final Results of Antidumping Duty Administrative Review, 73 FR 7710 (February 11, 2008), and Stainless Steel Sheet and Strip in Coils from Mexico: Amended Final Results of Antidumping Duty Administrative Review, 73 FR 14215 (March 17, 2008)); see also Stainless Steel Sheet and Strip in Coils from Mexico; Preliminary Results of Antidumping Duty Administrative Review, 71 FR 35618 (June 21, 2006) at 35623 (unchanged in Stainless Steel Sheet and Strip in Coils From Mexico; Final Results of Antidumping Duty Administrative Review, 71 FR 76978 (December 22, 2006)). Further discussion of imputed credit expenses is found at Comment 1.

Accordingly, on August 24, 2009, we recalculated the handling expenses and imputed credit expenses consistent with past administrative reviews of this case. See, e.g., Stainless Steel Sheet and Strip in Coils From Mexico; Preliminary Results of Antidumping Duty Administrative Review, 73 FR 45708 (August 6, 2008) at 45715 (unchanged in Stainless Steel Sheet and Strip in Coils from Mexico; Final Results of Antidumping Duty Administrative Review, 74 FR 6365 (February 9, 2009)), and accompanying Issues and Decision Memorandum at Comment 1 (for imputed credit expenses); see also Stainless Steel Sheet and Strip in Coils from Mexico; Preliminary Results of Antidumping Duty Administrative Review, 72 FR 43600 (August 6, 2007) at 43605 (unchanged in Stainless Steel Sheet and Strip in Coils from Mexico; Final Results of Antidumping Duty Administrative Review, 73 FR 7710 (February 11, 2008), and Stainless Steel Sheet and Strip in Coils from Mexico: Amended Final Results of Antidumping Duty Administrative Review, 73 FR 14215 (March 17, 2008)); see also Stainless Steel Sheet and Strip in Coils from Mexico; Preliminary Results of Antidumping Duty Administrative Review, 71 FR 35618 (June 21, 2006) at 35623 (unchanged in Stainless Steel Sheet and Strip in Coils From Mexico; Final Results of Antidumping Duty Administrative Review, 71 FR 76978 (December 22, 2006)).

We have recalculated the handling expenses incurred by Mexinox’s home market affiliate, Mexinox Trading, and applied the revised ratio to those home market sales for which Mexinox reported a handling expense, as discussed above. These changes are discussed in the relevant sections of the Issues and Decision Memorandum and Final Analysis Memorandum.

### Final Results of Review

We determine the following weighted-average percentage margin exists for the period July 1, 2007 to June 30, 2008:

<table>
<thead>
<tr>
<th>Manufacturer/exporter</th>
<th>Weighted average margin (percentage)</th>
</tr>
</thead>
<tbody>
<tr>
<td>ThyssenKrupp Mexinox S.A. de C.V.</td>
<td>4.48</td>
</tr>
</tbody>
</table>

#### Assessment

The Department will determine, and U.S. Customs and Border Protection (CBP) shall assess, antidumping duties on all appropriate entries, pursuant to section 751(a)(1) of the Tariff Act of 1930, as amended (the Act), and 19 CFR 351.212(b). The Department calculated an assessment rate for each importer of the subject merchandise covered by the review. Upon issuance of the final results of this review, for any importer-specific assessment rates calculated in the final results that are above de minimis (i.e., at or above 0.50 percent), we will issue appraisement instructions directly to CBP to assess antidumping duties on appropriate entries by applying the per-unit dollar amount against each unit of merchandise on each of that importer’s entries during the review period. See 19 CFR 351.212(b)(1). Pursuant to 19 CFR 356.8(a), the Department intends to issue assessment instructions to CBP 41 days after the date of publication of these final results of review.

The Department clarified its “automatic assessment” regulation on May 6, 2003. See Antidumping and Countervailing Duty Proceedings: Assessment of Antidumping Duties, 68 FR 23954 (May 6, 2003). This clarification will apply to entries of subject merchandise during the POR produced by Mexinox for which Mexinox did not know the merchandise was destined for the United States. In

---

*Ken-Mac Metals is an affiliated service center headquartered in Cleveland, Ohio, whose primary business is the resale and further-processing of aluminum, stainless steel, and other metals. See Mexinox’s October 7, 2008, response to the Department’s section A antidumping duty questionnaire at 15–18 for additional information regarding Ken-Mac’s operations.*
such instances, we will instruct CBP to liquidate unreviewed entries at the 30.69 percent all-others rate if there is no company-specific rate for an intermediary involved in the transaction.

**Cash Deposit Requirements**

The following cash deposit requirements will be effective upon publication of these final results for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date of these final results of administrative review, consistent with section 751(a)(1) of the Act: (1) The cash deposit rate for the reviewed company will be the rate listed above; (2) if the exporter is not a firm covered in this review, a prior review, or the original LTFV investigation, the cash deposit rate will continue to be the company-specific rate published in the preliminary results of the most recent period; (3) if the exporter is not a firm covered in this review, a prior review, or the original LTFV investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recent period for the manufacturer of the merchandise; and (4) the cash deposit rate for all other manufacturers or exporters will continue to be 30.69 percent, the all-others rate established for the most recent period; (5) If the exporter is not a firm covered in this review, a prior review, or the original LTFV investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recent period for the manufacturer of the merchandise; and (4) the cash deposit rate for all other manufacturers or exporters will continue to be 30.69 percent, the all-others rate established for the most recent period.

**Appendix**

**List of Issues in Issues and Decision Memorandum**

**General Issues**

- Comment 1: Clerical Errors.
- Comment 2: Offsetting for U.S. Sales that Exceed Normal Value.
- Comment 3: Date of Sale.
- Comment 4: U.S. Indirect Selling Expenses.
- Comment 5: Calculation of Credit Expenses.
- Comment 6: Whether to Apply an Alternative Cost Averaging Methodology.
- Comment 7: General and Administrative Expense Ratio (Employee Profit Sharing).
- Comment 8: General and Administrative Expense Ratio (Gains on Sale of Warehouse).

**Supplementary Information:**

**Background**

This review covers two producers/exporters: Hitachi Cable and NKKN. On August 7, 2009, the Department published in the Federal Register the preliminary results of the 2007–2008 administrative review of the antidumping duty order on SSSSC from Japan. See Stainless Steel Sheet and Strip in Coils from Japan: Preliminary Results of Antidumping Duty Administrative Review, 74 FR 39615 (August 7, 2009) (Preliminary Results).

We invited parties to comment on those preliminary results. Since the Preliminary Results, we conducted the cost verification of Hitachi Cable from September 28 through October 2, 2009.

On October 28, 2009, we extended the deadline for the final results until no later than February 3, 2010. See Stainless Steel Sheet and Strip in Coils from Japan: Notice of Extension of Time Limit for the Final Results of the 2007–2008 Administrative Review, 74 FR 55539 (October 28, 2009).

On November 18, 2009, we received case briefs from the domestic producers of the subject merchandise (i.e., AK Steel Corporation and Allegheny Technologies, Inc.) and NKKN. A rebuttal brief was received from Hitachi on November 25, 2009.

The Department has conducted this administrative review in accordance with section 751 of the Tariff Act of 1930, as amended (the Act).

**Scope of the Order**

For purposes of this order, the products covered are certain SSSSC. Stainless steel is an alloy steel containing, by weight, 1.2 percent or less of carbon and 10.5 percent or more...
