

National Environmental Policy Act (NEPA) (42 U.S.C. 4231 *et seq.*) and in a biological opinion prepared pursuant to the ESA in October 2009 on this modification. The proposed permit would have no additional impact to the human environment or effects on threatened or endangered species beyond those analyzed in these documents. NMFS now reviews the remaining requirements to issue a permit to take CNP humpback whales incidental to the Hawaii-based longline fisheries.

Recovery Plan. The recovery plan for humpback whales was completed and in place in 1991. This plan has guided ESA recovery efforts for humpback whales globally since that time. Accordingly, the requirement to have a recovery plan in place or being developed is satisfied.

Vessel Registration. MMPA section 118(c)(5)(A) provides that registration of vessels in fisheries should, after appropriate consultations, be integrated and coordinated to the maximum extent feasible with existing fisher licenses, registrations, and related programs. Participants in the Hawaii-based longline fisheries are required to hold a permit under 50 CFR 665.21. The MMPA registration program has been integrated in this permitting system for the Hawaii-based longline fisheries. Accordingly, vessels in the fisheries are registered in accordance with MMPA section 118.

Monitoring Program. As noted above, the Hawaii-based longline fisheries have been observed since the early 1990s. Current levels of observer coverage in the deep-set fishery (20 percent or higher) are adequate to produce reliable estimates; mandatory observer coverage in the shallow-set fishery is 100%. Accordingly, as required by MMPA section 118, a monitoring program is in place.

Take Reduction Plan (TRP). Subject to available funding, MMPA section 118 requires a TRP in cases where a strategic stock interacts with a Category I or II fishery. The CNP stock of humpback whales is considered a strategic stock under the MMPA because humpback whales are listed under the ESA. This strategic stock interacts with the Category I and II Hawaii-based longline fisheries. Currently, there is no TRP for the CNP stock of humpback whales. The short- and long-term goals of a TRP are to reduce mortality and serious injury of marine mammals incidental to commercial fishing. However, the obligations to develop and implement a TRP are subject to the availability of funding. MMPA section 118(f)(3) (16

U.S.C. 1387(f)(3)) contains specific priorities for developing TRPs.

NMFS has insufficient funding available to simultaneously develop and implement a TRP for all stocks that interact with Category I or Category II fisheries. Most recently in March of 2009, NMFS considered multiple quantitative and qualitative factors to identify its priorities for establishing take reduction teams (TRTs) and collecting data. As provided in MMPA section 118(f)(6)(A) and (f)(7), NMFS used the most recent stock assessment reports (SARs) and List of Fisheries (LOF) as the basis to determine its priorities for establishing TRTs and developing TRPs. Through this evaluative process, the CNP stock of humpback whale was rated as "low" priority for establishing a TRT. Indeed, observer reports since 1994 indicate that there have been zero serious injuries or mortalities of a CNP humpback whale in the Hawaii-based deep-set longline fishery, and only one serious injury (and no mortalities) of a CNP humpback whale in the Hawaii-based shallow-set longline fishery. Accordingly, given these factors and NMFS' prioritization process, a TRP will be deferred under section 118 as other stocks have a higher priority for any available funding for establishing new TRPs.

As noted in the summary above, all of the requirements to issue a permit to the Hawaii-based longline fisheries have been satisfied. Accordingly, NMFS proposes to issue a permit to the Hawaii-based deep- and shallow-set longline fisheries for the taking CNP humpback whales incidental to the fisheries' operations. Taking of these whales in the deep-set fishery would be limited to non-lethal taking only (harassment and injury). Taking of these whales in the shallow-set fishery would include non-lethal taking and up to one lethal (serious injury or mortality) take per year in the shallow-set fishery. NMFS solicits public comments on the proposed permit and the preliminary determinations supporting the permit.
