DEPARTMENT OF THE INTERIOR

Central Utah Project Completion Act

AGENCY: Department of the Interior, Office of the Assistant Secretary—Water and Science.

ACTION: Notice of Availability of the Finding of No Significant Impact associated with the Environmental Assessment for the East Juab Water Efficiency Project—Phase II, Juab County, Utah.

SUMMARY: On January 8, 2010, the Department of the Interior (Interior) signed a Finding of No Significant Impact (FONSI) which documents the selection for implementation of Alternative 1 as presented in the Final Environmental Assessment (EA) for the

East Juab Water Efficiency Project—Phase II, Juab County, Utah.

ADDRESSES: Copies of the Final EA and FONSI are available for inspection at:

- Central Utah Water Conservancy District, Attention Sarah Sutherland 355 West University Parkway, Orem, Utah 84058-7303.

- Department of the Interior, Attention Lee Baxter, Central Utah Project Completion Act Office, 302 East 1860 South, Provo, Utah 84606.

In addition, the document is available at <http://www.cuwcd.com>.

FOR FURTHER INFORMATION: Additional information may be obtained by contacting Mr. Lee Baxter at (801) 379-1174, or by e-mail at lbaxter@uc.usbr.gov.

SUPPLEMENTARY INFORMATION: Interior has determined that implementing Alternative 1 as described in the EA will not have a significant impact on the quality of the human environment and that an environmental impact statement is not required.

This project anticipates the rehabilitation of several existing wells, installation of additional booster pump capability, extension of associated distribution system pipelines and overhead power lines, and development and implementation of a supervisory control and data acquisition system.

Also anticipated is the construction of a bypass pipeline along a segment of Spring Creek channel to reduce loss of water during the late irrigation season period of water shortage, and perforated infiltration pipelines to recharge water to the groundwater basin at other times.

These actions are proposed to be taken in order to more efficiently utilize existing ground-water supplies in conjunction with existing surface water supplies.

The Bonneville Unit of the Central Utah Project was authorized to develop central Utah's water resources. Both the 1987 Final Supplement to the Final Environmental Impact Statement for the Municipal and Industrial System, Bonneville Unit, Central Utah Project and the 2004 Supplement to the 188 Definite Plan Report for the Bonneville Unit anticipated additional water development in East Juab County. Under the authority of Section 202 of the Central Utah Project Completion Act (Pub. L. 102-575), the Secretary of the Interior oversees Bonneville Unit water development, and specifically has authority to provide cost share associated with Conjunctive Use investigations and projects.

Dated: January 12, 2010.

Reed R. Murray,

Program Director, Central Utah Project Completion Act, Department of the Interior.

SUPPLEMENTARY INFORMATION:

Introduction

With this notice, we initiate our process for developing a CCP for Quivira National Wildlife Refuge in Stafford, KS. This notice complies with our CCP policy to (1) advise other Federal and State agencies, Tribes, and the public of our intention to conduct detailed planning on this refuge and (2) obtain suggestions and information on the scope of issues to consider in the environmental document and during development of the CCP.

Background

The CCP Process

The National Wildlife Refuge System Administration Act of 1966 (16 U.S.C. 668dd-668ee) (Administration Act), as

amended by the National Wildlife Refuge System Improvement Act of 1997, requires us to develop a CCP for each national wildlife refuge. The purpose for developing a CCP is to provide refuge managers with a 15-year plan for achieving refuge purposes and contributing toward the mission of the National Wildlife Refuge System, consistent with sound principles of fish and wildlife management, conservation, legal mandates, and our policies. In addition to outlining broad management direction on conserving wildlife and their habitats, CCPs identify wildlife-dependent recreational opportunities available to the public, including opportunities for hunting, fishing, wildlife observation and photography, and environmental education and interpretation. We will review and update the CCP at least every 15 years in accordance with the Administration Act.

Each unit of the National Wildlife Refuge System was established for specific purposes. We use these purposes as the foundation for developing and prioritizing the management goals and objectives for each refuge within the National Wildlife Refuge System, and to determine how the public can use each refuge. The planning process is a way for us and the public to evaluate management goals and objectives that will ensure the best possible approach to wildlife, plant, and habitat conservation, while providing for wildlife-dependent recreation opportunities that are compatible with each refuge's establishing purposes and the mission of the National Wildlife Refuge System.

Our CCP process provides participation opportunities for Tribal, State, and local governments; agencies; organizations; and the public. At this time we encourage input in the form of issues, concerns, ideas, and suggestions for the future management of the Quivira National Wildlife Refuge.

We will conduct the environmental review of this project and develop an EA in accordance with the requirements of the National Environmental Policy Act of 1969, as amended (NEPA) (42 U.S.C. 4321 *et seq.*); NEPA regulations (40 CFR parts 1500-1508); other appropriate Federal laws and regulations; and our policies and procedures for compliance with those laws and regulations.
