[Project No. 606-027-CA]

Kilarc-Cow Creek Hydroelectric Project; Notice of Intention To Prepare an Environmental Impact Statement

February 19, 2010.

The Federal Energy Regulatory Commission (FERC) has received an application for surrender of license for the Kilarc-Cow Creek Hydroelectric Project, FERC No. 606. The project contains two developments and is located on Old Cow Creek and South Cow Creek in Shasta County, northern California.

In the March 13, 2009 application, Pacific Gas and Electric Company (licensee) proposes to surrender the license, decommission and remove project facilities, as described in its proposed decommissioning plan. In general, (1) diversion dams would be removed to stop water diversions and to allow for free passage of fish and sediment; (2) some diversion dam abutments and foundations would be left in place to protect stream banks and provide grade control; (3) both powerhouse structures would be secured and left in place during decommissioning and an option for future reuse of the powerhouse structures would be preserved; (4) electric generators, turbines and other equipment would be removed; (5) both forebays would be graded and filled; and (6) canal segments would be left in place, breached, or filled in consultation with affected landowners, and metal and wood flume structures would be removed. The licensee consulted with federal, state, local agencies, and other parties with potential interest, during the license surrender application process.

As a result of the public scoping process and environmental site review, the FERC staff has determined that the proposed license surrender would constitute a major federal action significantly affecting the quality of the human environment. Therefore, the staff intends to prepare an environmental impact statement (EIS) on the surrendering of the hydroelectric project
