financial agencies, is proposing to collect data from national financial institutions with respect to the following subjects:

- Revisions to the Basel II market risk framework and guidelines for computing capital for incremental risk in the trading book, including the incremental capital risk charge; the comprehensive risk measure for correlation trading portfolios; the new rules for securitization exposures in the trading book; and the revised capital charges for certain equity exposures subject to the standardized measurement method for market risk.
- Enhancements to the Basel II framework including the revised risk weights for re-securitizations held in the banking book.
- Enhancements to strengthen the resilience of the financial institution sector including the proposed changes to the definition of capital; the proposed introduction of a leverage ratio; and the proposed changes to the treatment of counterparty credit risk.
- Liquidity enhancements referring to the international framework for liquidity risk measurement, standards and monitoring.
- Operational risk and countercyclical tools.

The OTS intends to collect data for the QIS financial institutions subject to the Basel II Capital Framework and those subject to the current risk-based capital guidelines (Basel I). Unless otherwise noted, all data would be reported on a consolidated basis. Ideally, financial institutions should include all their assets in this information collection. However, due to data limitations, inclusion of some assets (for example, the portfolio of a minor subsidiary) may not be feasible. Exclusion of such assets is acceptable, as long as the remaining assets are representative of the financial institution as a whole.

Type of Review: New collection.
AFFECTED PUBLIC: Businesses or other for-profit.

Estimated Number of Respondents: 5.
Estimated Burden Hours per Response: 117.
