NUCLEAR REGULATORY COMMISSION

[Docket No.: 70-7016; NRC-2009-0157]

Notice of Receipt and Availability of Environmental Report Supplement 2 for the Proposed GE-Hitachi Global Laser Enrichment Laser-Based Uranium Enrichment Facility

On January 13, 2009, GE-Hitachi Global Laser Enrichment, LLC (GLE)

was granted an exemption to file its environmental report in advance of its license application. GLE submitted its Environmental Report (ER) on January 30, 2009 (ML090910573), that proposes the construction, operation, and decommissioning of a laser-based uranium enrichment facility. The proposed facility would be located approximately six miles north of the City of Wilmington in New Hanover County, North Carolina.

The U.S. Nuclear Regulatory Commission (NRC or the Commission) published a Notice of Intent to Prepare an Environmental Impact Statement (EIS) on the proposed action and the opportunity for public comment on the scope of issues to be considered in the EIS (74 FR 16237) (April 9, 2009). The comment period was extended to allow members of the public to review the publicly available portions of the license application (July 24, 2009), (74 FR 36781). The license application was submitted on June 26, 2009, (ML091871003).

On May 8, 2009, the NRC granted an exemption to authorize GLE to conduct site preparation and pre-construction activities on the Wilmington site. GLE submitted Supplement 1 to its ER on July 13, 2009, *GLE Environmental Report Supplement 1—Early Construction* (ML092100577). Supplement 1 distinguishes between the environmental impacts of pre-construction activities covered by the exemption and NRC authorized construction activities which will not be undertaken unless a license is granted. On November 13, 2009, GLE submitted Supplement 2 to its ER, *GLE Environmental Report Supplement 2—Revised Roadway and Entrance* (ML093240135). Supplement 2 provides information describing the environmental impacts associated with revising the location of the entrance and roadway into the Wilmington site.

On January 13, 2010, the NRC issued an order that announced the receipt of an application from GLE for a license to possess and use source, byproduct, and special nuclear material and to enrich natural uranium to a maximum of 8 percent U-235 by a laser-based enrichment process. This order also included the Notice of Consideration of Issuance of License; Notice of Hearing and Commission Order; and Order Imposing Procedures for Access to Sensitive Unclassified Non-Safeguards Information and Safeguards Information for Contention Preparation (75 FR 1819) (January 13, 2010).
