B. What Should I Consider as I Prepare My Comments for EPA?

1. Submitting CBI. Do not submit this information to EPA through regulations.gov or e-mail. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD-ROM that you mail to EPA, mark the outside of the disk or CD-ROM as CBI and then identify electronically within the disk or CD-ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. Tips for preparing your comments. When submitting comments, remember to:

   i. Identify the document by docket ID number and other identifying information (subject heading, Federal Register date, and page number).
   ii. Follow directions. The Agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.
   iii. Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.
   iv. Describe any assumptions and provide any technical information and/or data that you used.
   v. If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.
   vi. Provide specific examples to illustrate your concerns and suggest alternatives.
   vii. Explain your views as clearly as possible, avoiding the use of profanity or personal attacks.
   viii. Make sure to submit your comments by the comment period deadline identified.

3. Environmental justice. EPA seeks to achieve environmental justice, the fair treatment and meaningful involvement of any group, including minority and/or low-income populations, in the development, implementation, and enforcement of environmental laws, regulations, and policies. To help address potential environmental justice issues, the Agency seeks information on any groups or segments of the population who, as a result of their location, cultural practices, or other factors, may have a typical or disproportionately high and adverse human health impacts or environmental effects from exposure to the pesticides discussed in this document, compared to the general population.

II. What Action is the Agency Taking?

EPA is announcing its receipt of several pesticide petitions filed under section 408 of the Federal Food, Drug, and Cosmetic Act (FFDCA). 21 U.S.C. 346a, proposing the establishment of regulations in 40 CFR part 180 for residues of pesticide chemicals in or on various food commodities. EPA has determined that the pesticide petitions described in this notice contain the data section of FFDCA 408(d)(2); however, EPA has not fully evaluated the sufficiency of the submitted data at this time or whether the data support granting of the pesticide petitions. Additional data may be needed before EPA can make a final determination on these pesticide petitions.

In accordance with 40 CFR 180.7(f), a summary of each of the petitions that are the subject of this notice, prepared by the petitioner, is included in a docket EPA has created for each rulemaking. The docket for each of the petitions is available on-line at http://www.regulations.gov.

As specified in FFDCA section 408(d)(3), (21 U.S.C. 346a(d)(3)), EPA is publishing a notice of the petitions so that the public has an opportunity to comment on these requests for the establishment of regulations for residues of pesticides in or on food commodities. Further information on the petitions may be obtained through the petition summaries referenced in this unit.

New Tolerance Exemptions

1. PP 0F7681. (EPA–HQ–OPP–2010–0078). Marrone Bio Innovations Incorporated, 2121 Second Street, Suite B-107, Davis, CA 95618, proposes to establish an exemption from the requirement of a tolerance for residues of the microbial pesticide, Streptomyces acidiscabies strain RL-110², in or on all agricultural commodities. The petitioner believes no analytical method is needed because when used as proposed, Streptomyces acidiscabies strain RL-110² will not result in residues that are of toxicological concern.

2. PP 9F7635. (EPA–HQ–OPP–2010–0055). Interregional Research Project Number 4 (IR-4), Rutgers University, 500 College Road East, Suite 201W, Princeton, NJ 08540 (on behalf of BioProdx Incorporated, 8520 NW 2 Place, Gainesville, FL 32607–1423), proposes to establish an exemption from the requirement of a tolerance for residues of the herbicide, Tobacco Mild Green Mosaic Tobamovirus, in or on all food commodities. The petitioner believes no analytical method is needed because Tobacco Mild Green Mosaic Tobamovirus occurs in fruiting vegetables, cucurbits, tobacco, and many other crops and is, therefore, indistinguishable from background levels normally present in the environment. Furthermore, since an exemption from tolerance is being requested, the petitioner has also emphasized that there is no need to analyze for residues. The petitioner believes no analytical method is needed because Paecilomyces fumosoroseus strain FE 9901 are not expected to occur as it degrades rapidly in sunlight and in high temperatures, conditions commonly found in greenhouses.
